reports into a coherent narrative, this book accurately describes the technological and economic opportunities of nanotechnology in all important sectors of industry affected. As such, it provides an in depth-analysis within the context of product groups and lead markets on the international level, with the focus on Germany. Much cited internationally, Gerd Bachmann applies a so-called method mix to avoid the weaknesses of other studies conducted purely using quantitative research methods, which leave too many white spots to enable an accurate analysis. Also includes proofs for market potential based on patent data.

Manual  
health. The mechanics and challenges of measurement of subjective health are then described. Later chapters include handy definitions of relevant concepts and detailed descriptions of specific scales – both familiar and relatively new ones – including psychometric testing and use. This text is packed with useful information and can be used both as a resource for an overall understanding of measuring health and well-being or for selecting specific patient-based health scales for research projects." Dr. Nan Greenwood, Reader in Health and Social Care Service Research, St George's University of London and Kingston University, UK
