AMCC's 3ware 9650SE SATA II hardware RAID controllers deliver industry-leading RAID 6 and RAID 5 performance, robust fault tolerance, and multi-terabyte capacities. A PCI Express host interface, Multi-lane ™ connectivity, StorSwitch ™ architecture, and sophisticated SATA II features drive this unrivaled performance. 3ware 9650SE Specifications

An authoritative, detailed overview of the multi-faceted, flexible peripheral interface--straight from NCR. This sourcebook provides an in-depth explanation of the SCSI used on NeXT and MAC IIX computers, among others.

Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave.

Typical practical applications of VSDs in process control and materials handling, such as those for pumping, ventilation, conveyers, compressors and hoists are covered in detail. · Provides a fundamental understanding of the installation, operation and troubleshooting of Variable Speed Drives (VSDs) · Includes practical coverage of key topics such as troubleshooting, control wiring, operating modes, braking types, automatic restart, harmonics, electrostatic discharge and EMC/EMI issues · Essential reading for electrical engineers and those using VSDs for applications such as pumping, ventilation, conveyors and hoists in process control, materials handling and other industrial contexts

"This IBM Redbooks publication covers the planning, implementation, and management of IBM System z FICON environments. It discusses the FICON and Fibre Channel architectures, terminology, and supported topologies. The book focuses on the hardware installation and the software definitions that are needed to provide connectivity to FICON environments. You will find configuration examples required to support FICON control units, FICON Channel-to-Channel (FCTC), and FICON Directors. It also discusses utilities and commands that are useful for monitoring and managing the FICON environment"--Resource description p.

Storage Area Networks provide highly reliable, high-performance connectivity between hosts and storage devices. This allows storage resource sharing, improving asset utilization, and enabling solutions such as high availability, disaster recovery, information lifecycle management, and utility computing. These solutions provide a high return on investment, resulting in an accelerating SAN adoption rate in all IT markets.This book provides an overview of SAN protocols and technologies, and practical guidance on SAN design, implementation, and management topics. Some future SAN trends and technologies are discussed, but the focus is on designing SANs with current, real-world products such as Fibre Channel switches and routers.Principles of SAN Design offers a "one stop shop" for SAN design knowledge. Why wait? Read the definitive work on SAN design today!

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Jan Vansina's 1961 book, Oral Tradition, was hailed internationally as a pioneering work in the field of ethno-history. Originally published in French, it was translated into English, Spanish, Italian, Arabic, and Hungarian. Reviewers were unanimous in their praise of Vansina's success in subjecting oral traditions to intense functional analysis. Now, Vansina-with the benefit of two decades of additional thought and research-has revised his original work substantially, completely rewriting some sections and adding much new material. The result is an essentially new work, indispensable to all students and scholars of history, anthropology, folklore, and ethno-history who are concerned with the transmission and potential uses of oral material. "Those embarking on the challenging adventure of historical fieldwork with an oral community will find the book a valuable companion, filled with good practical advice. Those who already have collected bodies of oral material, or who strive to interpret and analyze that collected by others, will be forced to subject their own methodological approaches to a critical reexamination in the light of Vansina's thoughtful and provocative insights. . . . For the second time in a quarter of a century, we are profoundly in the debt of Jan Vansina."--Research in African Literatures "Oral Traditions as History is an essential addition to the basic literature of African history."--American Historical Review

Can the Librarian help three students trapped in the Puzzler's maze-like park full of dangerous riddles and twisted storybook creatures?

Modern telecommunications and data transmission involve many disciplines and their specializations. Provides the necessary guidance to incorporate the many disciplines involved in transmission and coordinate them into an optimal operational system. The emphasis is on point-to-point transmission systems. Covers broadband radio, line-of-sight microwave, tropospheric scatter, satellite communications, narrow band radio, cable, fiber optic and data, video and facsimile transmission.
