links." These methods are described in a cookbook fashion. They are supported by a thorough discussion of the experiences with the application of these processes to actual components, the weak links found, the corrective actions taken, and the significant improvements in service life achieved. The great effect that properties of nonmetallic materials have on component life are included. This includes an introduction to the family tree of polymeric materials and an extensive tabulation of 120 dynamic interface configurations and designs that were investigated and rated
