Results from national and international assessments indicate that school children in the United States are

not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. *Helping Children Learn Mathematics* provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre-kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

A colorful and inspiring way to instill the message that we are each wonderfully treasured and made. Fun Fact: In early spring 2013, while putting socks on her newest daughter's feet, the author Ruth spoke out loud, "Look at those toes, where will they go?" In a moment of sheer inspiration, she grabbed her eldest daughter's Tinkerbell notebook, and between folding laundry and scrambling eggs, wrote the manuscript for this book.
