Military recruitment will become more difficult in times of demographic aging. The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests. Since contemporary military operations still display a strong human element, particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth. An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future. A concluding review of recruiting practices in other NATO countries provides insight in best-practice policy options to reduce the military's sensitivity to demographic change. Following this approach, the book gives prominence to a topic that has thus far been under-represented in the greater discussion of demographic change today, namely the demographic impact on international affairs and strategic calculations.

Social scientists, politicians, and economists have recently been taken with the idea that the advanced welfare states of Europe face a "New Social Question." The core idea is that the transition from an industrial to a postindustrial environment has brought with it a whole new set of social risks, constraints, and trade-offs, which necessitate radical recalibration of social security systems. A New Social Question? analyzes that question in depth, with particular attention to the problem of income protection and the difficulties facing Bismarckian welfare states. It will be necessary reading for

The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. While these acts have shaped the international profile of German pop music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diedrich Diederichsen. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

Therapeutic regimens for visceral leishmaniasis (also Kala-azar, Dum-dum fever or black fever), caused by parasitic protozoa of the *Leishmania* genus, evolve at a pace never seen before. Spread by tiny and abundant sand flies, the parasite infects internal organs and bone marrow and if left untreated will almost always result in the death of the host. In developing countries successful diagnosis and treatment are complicated by asymptomatic cases, undernutrition and Kala-azar/HIV co-infections. This book brings together world-renown experts writing state-of-arts review on the progress in diagnosis and treatment of visceral leishmaniasis, ultimately leading to the complete elimination of this fatal disease from South Asia. The chapters provide valuable information for disease control as well as therapy and the diagnostic improvements necessary for early treatment, subclinical detection and drug-resistant cases. The presented methods allow for points-of-care testing in the endemic area, enabling rapid detection in resource-poor settings with easy handling and low costs. This book provides essential information for scientists, medical practitioners and policy makers involved in the diagnosis, treatment and elimination of Kala-azar.

This book brings together leading experts to assess how and whether the Nazis were successful in fostering collaboration to secure the resources they required during World War II. These studies of the occupation regimes in Norway and Western Europe reveal that the Nazis developed highly sophisticated instruments of exploitation beyond oppression and looting. The authors highlight that in comparison to the heavy manufacturing industries of Western Europe, Norway could provide many raw materials that the German war machine desperately needed, such as aluminium, nickel, molybdenum and fish. These chapters demonstrate that the Nazis provided incentives to foster economic collaboration, hoping that these would make every mine, factory and smelter produce at its highest level of capacity. All readers will learn about the unique part of Norwegian economic collaboration during this period and discover the rich context of economic collaboration across Europe during World War II.

Already I have found myself quoting Anne Bishop's wisdom: her simple advice is compelling. Right now in Australia she has the power to lead us as we struggle with questions of guilt, responsibility and patterns of oppression which are 'larger than ourselves'. Rev. Tim Costello, President, Baptist Union of Australia Becoming an Ally is must reading for anyone concerned with understanding and challenging the dynamics, forms, and sources of oppression-whether it is their own oppression, that of others, or both.

Bob Mullaly is Head of Social Work at Victoria University, Melbourne Where does oppression come from? Has it always been with us, just 'human nature'? What can we do to change it? What does individual healing have to do with the struggles for social justice? What does social justice have to do with individual healing? Why do members of the same oppressed group fight each other, sometimes more viciously than their oppressor? Why do some who experience oppression develop a life-long commitment to fighting oppression, while others turn around and oppress others? Anne Bishop draws on her many years experience in community work to write this feisty and bestselling guide for activists, community workers and welfare workers.
