Abel/Bernanke/Croushore/Kneebone is a well respected, Intermediate Macroeconomics text that takes a balanced Keynesian and Classical approach. Praised in its previous editions for giving students the tools they need to think critically and coherently about macroeconomics, Macroeconomics, Seventh Canadian Edition, has been revised to include new material to keep the text modern and up to date, while building on the strengths that underline the book's

lasting appeal.

In recent years, innovative texts in mathematics, science, foreign languages, and other fields have achieved dramatic pedagogical gains by abandoning the traditional encyclopedic approach in favor of teaching a shorter list of core principles in depth. Two well-respected writers and researchers, Bob Frank and Ben Bernanke, have shown that the less-is-more approach affords similar gains in introductory economics. The authors introduce a coherent short list of core principles and reinforce them by illustrating and applying each in numerous contexts. With engaging questions, explanations and exercises, the authors help students relate economic principles to a host of everyday experiences such as going to the ATM or purchasing airline tickets. Throughout this process, the authors encourage students to become economic naturalists: people who employ basic economic principles to understand and explain what they observe in the world around them. Principles of Microeconomics, fifth edition, is thoroughly updated with examples that connect to current events such as the financial crisis of 2008 and Great Recession of 2007-2009 as well as other topics commonly discussed in the media. In addition, the text is paired with McGraw-Hill's market-leading online assignment and assessment solution Connect Economics, providing tools to enhance course management and student learning.
