Sally can paint $\frac{1}{4}$ of the house in 1 hour. John can paint $\frac{1}{6}$ of the same house in 1 hour. In order to determine how long it will take them to paint the house, when working together, the following equation may be written: $\frac{1}{4}x + \frac{1}{6}x = 1$. Solving for x gives $\frac{5}{12}x = 1$, where $x = 2.4$ hours, or 2 hours, 24 minutes. 3. D

This study investigates the accuracy of the tools used by a Southern California school district in placing 7th grade students into an 8th grade Algebra 1 course. The school records of 107 current 8th grade Algebra students were analyzed. The students' 7th grade Pre-Algebra grades and 7th grade scores on the MDTP (Mathematics Diagnostic Testing Project) placement test were compared to the success of these same students in 8th grade Algebra 1. Success was determined on the basis of Algebra 1 final grades as well as results on the district wide end-of-course exam. The data was analyzed statistically using correlation and regression models to determine the accuracy of 7th grade Pre-Algebra grades and student scores on the MDTP placement test as predictors of student success in 8th grade Algebra 1. The results show that students' grades in 7th grade Pre-Algebra were a better predictor of student success in 8th grade Algebra 1 than scores on the 7th grade MDTP placement test. In addition, multiple regression analysis showed that a combined contribution of both predictors had stronger predicting power than either predictor used individually. These findings indicate a need to look into the overall value of placement tests at the middle school level. Keywords: Algebra 1, middle school, placement tests, student placement, tracking

Miller Test Prep's study guide for the ACCUPLACER is the solution for students who want to maximize their score and minimize study time. Our study guides are carefully designed to provide only that clear and concise information you need. That's precisely why we put "Clear & Concise" on our cover. The standard for the study guide industry is to "throw in the kitchen sink" when it comes to making a book, meaning you are stuck with hundreds of pages of repetitive information, redundant and confusing examples, and more practice questions than any person could be expected to work through. This results in students feeling overwhelmed, leading to reduced self-confidence, which leads to lower scores! Instead, Miller Test Prep has worked specifically with tutors. Why tutors you ask? Tutors specialize in helping students comprehend information that has already been presented by a teacher. That means they see time and again what students struggle with and what actually works to help them. They specialize in helping students who have previously failed, to succeed. We compiled their decades of experience helping students just like you into this study guide, so you pass the first time! In this ACCUPLACER book, we ensure you are thoroughly prepared for this critically important test: Comprehensive review of all ACCUPLACER exam sections: Reading Comprehension Sentence Skills Write Placer Mathematics Step-by-step examples for every concept tested Practice test questions like the real exam Detailed, thorough answer key explanations 6 complete essay examples with scoring explanations
