Written in a 'dialogue' style, in order to mimic the exam and build a candidate's confidence, this book discusses in a structured way over 100 representative topics that might come up in the viva.

Updated focusing on the learning needs of the new format MRCPCH Clinical examination. To maximise revision time, 3 parts represent the Clinical exam stations: Part 1 History Taking & Management Planning; Part 2 Communication Skills; Part 3 Clinical Stations. Written by paediatricians with experience of teaching and helping to run previous exams.

The MRCPCH clinical examination assesses whether candidates have reached the standard in clinical skills expected of a newly appointed specialist registrar, while the DCH recognises the competence of GPs and other health professionals in caring for children. Success in communication skills is vital to achieve overall success in these examinations. This revised and expanded Second Edition includes over a dozen new scenarios for both examinations, a new chapter on the general approach to effective communication, an expanded clinical exam mark sheet, anchor statements and exam circuit diagrams.

Although written to aid candidates for the clinical MRCPCH and DCH examinations, this book will also be useful to paediatric trainees in their day-to-day clinical encounters.

Radiology plays a fundamental role in the diagnosis and management of childhood diseases. This is reflected in both paediatric and radiology post graduate exams, where candidates are expected to have a working knowledge of paediatric pathology, clinical manifestations and appropriate radiological investigations. Building on the great success of the first edition, Paediatric Radiology for MRCPCH and FRCR retains the popular preexisting structure of the book, but presents an improved variety of clinical cases as well as updated text in-keeping with advances in medical practice and technology. There is more emphasis on cross-sectional imaging, as candidates are increasingly encountering these sophisticated imaging tests in postgraduate exams. Images have been updated, and all the clinical information has been reviewed and revised accordingly. Contains over 100 clinical cases, presented in exam format, with answers overleaf Includes a wide range of common and rare paediatric conditions with supplementary images to illustrate additional points Uses classic examination images, with salient radiological and clinical summaries of each condition - the "hot lists" Carries specific information for paediatricians and radiologists for each case An introductory chapter on the basic concepts of imaging aims to provide the reader with an approach to radiological imaging and an awareness of the different modalities available, with new sections on non-accidental injury and radiation protection.

This companion book to Volume 1 contains chapters on Infectious Diseases, Metabolic Medicine,

Get Free An Aid To The Mrcpch Viva Mrcpch Study Guides

Neonatology, Neurology, Ophthalmology, Respiratory, Rheumatology and Statistics.

Suitable for aspiring paediatricians who want to pass MRCPCH Part 1 examination, this book includes over 350 questions that are of a combination of MCQs, EMQs and Best of Fives to reflect the balance of questions in the exam and offer targeted, effective revision. It incorporates changes to the MRCPCH Part 1 exam.

Reflecting the latest exam formats, this book provides essential revision for those taking the Paediatric Membership exams - MRCPCH Papers 1a and 1b, and DCH diploma. Features over 500 completely up-to-date questions. Includes subject-based chapters for focussed revision. Includes all question formats likely to be encountered in the exam - BOF, MCQs and EMQs. Contains expanded answers to every question, helping students build understanding and confidence for success. Written by experienced, practising Paediatric Specialist Registrars, and edited by renowned author R Mark Beattie.

Suitable for candidates preparing for the MRCPCH exam, this title includes 24 specialty-based chapters that provide concise information in an accessible format.

Get Through MRCPCH Part 2: Data Interpretation Questions is based on the original title, 100 Data Interpretation Questions in Paediatrics for MRCPCH/MRCP, and provides valuable revision material for candidates sitting the two written papers for Part 2 of the Membership of the Royal College of Paediatrics and Child Health (MRCPCH) exam. This new edition has been revised and expanded and now includes four different question types: best of list; n from many; extended matching questions; and

Get Free An Aid To The Mrcpch Viva Mrcpch Study Guides

questions to which a written answer must be given. This gives the reader practice in real-life exam style questions as well as more open-ended questions that don't appear in the exam but really test the reader's knowledge while they are revising. It will prepare candidates for questions dealing with data interpretation, including ECGs, EEGs, growth charts, lists of test results and other materials commonly encountered in the examination. The answers are supplemented by invaluable extra information to help the reader understand why an answer is right or wrong, and to aid further revision on the topics covered. All cases have been selected according to the criteria of the MRCPCH exam, comprehensively covering all paediatric topics and coming from years of genuine clinical paediatric experience. This is an essential text for all candidates sitting the MRCPCH exam, as well as examiners and trainers for those exams, senior house officers, specialist registrars and their overseas equivalents.
