Language Building Blocks is an accessible resource that familiarizes early childhood professionals with linguistics, the scientific study of language. Knowledge of linguistics will enable early childhood educators to successfully teach young children core competencies, ranging from phonemic awareness, reading and math, to health literacy and intercultural awareness. The text includes numerous real-life examples for diverse age groups and learning styles. The online Resource Guide provides hands-on activities and contributions by top scholars in the field. This resource shows teachers how to systematically empower and include all children. This teacher-friendly book: Provides an enhanced understanding of language and language acquisition, minimizing misdiagnoses of special needs.Makes language come alive for children and educators preparing for the Praxis Test.Demonstrates that children develop key skills when they can (dis)assemble language.Highlights approaches Dr. Seuss used to make reading fun for young readers.Offers innovative language and literacy observation and enhancement strategies, including multilingual math and literacy, language exploration, and play.Illustrates the value of observation, collaboration, and inquiry in early learning. "The great value of this resource is that it offers numerous 'bridging' reflections, strategies, and specific instructional interventions. It is a must for any educator that must understand the significant link between language and achievement in schooling contexts." —From the Foreword by Eugene García "An extraordinarily informative, useful, and highly accessible tool for educators of young children of all language backgrounds. An excellent resource for teacher preparation and professional development." —Dorothy S. Strickland, Samuel DeWitt Proctor Professor of Education, Emerita, Distinguished Research Fellow, National Institute for Early Education Research (NIEER), Rutgers, The State University of New Jersey "Informativo! Educators must know how to break down language, how discourse mirrors culture, and how Spanish and other languages promote success in core content areas." —Rossana Ramirez Boyd, President, National Association for Bilingual Education "A truly necessary guide to understanding language for early childhood teachers in today's multicultural and multilingual world. Pandey clearly explains the fullness and potential of linguistic knowledge in teaching, honoring the role of the reflective teacher, and celebrating the uniqueness of young children and their languages worldwide." —Debora B. Wisneski, University of Nebraska at Omaha, President, Association for Childhood Education International (ACEI) Anita Pandey is professor of linguistics and coordinator of Professional Communication in the Department of English and Language Arts at Morgan State University, Baltimore, Maryland.

Using standardized testing formats, math skills are kept sharp with focused practice in computation, word problems, graphing, measurement and numbers. Includes scope and sequence charts and answer keys.

This is a perfect supplement to any classroom math curriculum. The book covers 40 weeks of daily practice. It includes 4 math exercises a day for four days a week. A separate assessment is included with every exercise.

If dinnertime has you cursing up a storm, this cookbook of 50 profane and delicious dishes will get you off your indecisive a** and into the f*#@#ing kitchen! Derived from the incredibly popular (and totally addictive) website, WhatTheFuckShouldMakeForDinner.com, this "choose your own adventure" style cookbook provides quick and easy solutions for the nightly conundrum. Every page is a new (and easy) meal, with enough pizzazz to keep you interested. Don't like the recipe? Simply choose another page for a new f*#@#ing idea! Making choices is hard, so let this book do it for you with 50 solid meal ideas-and a side of salty language-for meat-eaters and vegetarians alike, such as: Scallop Ceviche Grilled Skirt Steak with Chimichurri Red Flannel Hash Vegetarian Cassoulet Never hem and haw over what to make for dinner again! What the F*#@# Should I Make For Dinner? is the perfect gift for anyone who loves food, and will become your go-to guide to save you from headache, hunger, and your own wishy-washy self.

The book presents comparative analyses of five elementary mathematics curriculum programs used in the U.S. from three different perspectives: the mathematical emphasis, the pedagogical approaches, and how authors communicate with teachers. These perspectives comprise a framework for examining what curriculum materials are comprised of, what is involved in reading and interpreting them, and how curriculum authors can and do support teachers in this process. Although the focus of the analysis is 5 programs used at a particular point in time, this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general. Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program, in terms of sequencing, the nature of mathematical tasks (cognitive demand and ongoing practice), and the way representations are used. Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics, one another, the teacher, and the textbook around these mathematical ideas, as well as the role of the teacher. In order to examine how curriculum authors support teachers, we analyze how they communicate with teachers and what they communicate about, including the underlying mathematics, noticing student thinking, and rationale for design elements. The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors.

Collection of activities for daily use that review language arts concepts such as sentence editing, punctuation, grammar, vocabulary, spelling, and comprehension skills.

Build a foundation and focus on what matters most for math readiness with Common Core Math 4 Today: Daily Skill Practice for fourth grade. This 96-page comprehensive supplement contains standards-aligned reproducible activities designed to focus on critical math skills and concepts that meet the Common Core State Standards. Each page includes 16 problems to be completed during a four-day period. The exercises are arranged in a continuous spiral so that concepts are repeated weekly. An assessment for the fifth day is provided for evaluating students' understanding of the math concepts practiced throughout the week. Also included are a Common Core State Standards alignment matrix and an answer key.
