NATIONAL BOOK CRITICS CIRCLE AWARD WINNER ▯ The first full history of Black America's shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. "[Washington] has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book." (New York Times From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, Medical Apartheid details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge;a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government's notorious Tuskegee experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long undisturbed, Medical Apartheid reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers;and indeed the whole medical establishment;with such deep distrust.

Sweet Medicine takes place in Harare at the height of Zimbabwe's economic woes in 2008. Tsitsi, a young woman, raised by her strict, devout Catholic mother, believes that hard work, prayer and an education will ensure a prosperous and happy future. She does well at her mission boarding school, and goes on to obtain a scholarship to attend university, but the change in the economic situation in Zimbabwe destroys the old system where hard work and a degree guaranteed a good life. Out of university, Tsitsi finds herself in a position much lower than she had set her sights on, working as a clerk in the office of the local politician, Zvobgo. With a salary that barely provides her a means to survive, she finds herself increasingly compromising her Christian values to negotiate ways to get ahead. Panashe Chigumadzi is a young and upcoming media executive passionate about creating new narratives that work to redefine and reaffirm African identity. She is the founder and editor of Vanguard Magazine, a platform which aims to speak to the life of young black women coming of age in post-apartheid South Africa. She has previously worked as a TV journalist for CNBC Africa, a columnist for Forbes Woman Africa and a contributor to Forbes Africa. She has been invited to speak at a number of local and international events. In 2013 she became a member of the World Economic Forum's Global Shapers community, a network of young people who strive to make an impact in their communities. Panashe is a 2015 Ruth First Fellow at Wits University.
