and Ethics, 6e, is a unique and comprehensive text for today's Canadian students and practising professionals. Structured in five parts, the text is written in an approachable and engaging style that effectively covers practice and ethics topics while offering advice for readers to become effective professionals. The authors guide readers through professional licensing, practice, ethics, and environmental practice and ethics using history, case studies, examples, and images to bring the issues to life. The text devotes an entire chapter to preparing readers for the Professional Practice Examination (PPE), including practice questions to bolster success. Canadian Professional Engineering and Geoscience is up to date with Engineers Canada's practice and ethics syllabus and is the recommended study guide for this section of the PPE. The coverage in this sixth edition includes all provinces and territories of Canada and contains updated, new, and revised content and cases including the fascinating new case history: "Accidental Overdose: The Therac-25 Radiation Therapy Accidents." This edition has expanded its Employment, Management, and Consulting sections with new and relevant Canadian cases to keep readers engaged and connected to the content. Canadian Professional Engineering and Geoscience: Practice and Ethics is a vital professional resource for study and reference.

These lecture notes from the 1985 AMS Short Course examine a variety of topics from the contemporary theory of actuarial mathematics. Recent clarification in the concepts of probability and statistics has laid a much richer foundation for this theory. Other factors that have shaped the theory include the continuing advances in computer science, the flourishing mathematical theory of risk, developments in stochastic processes, and recent growth in the theory of finance. In turn, actuarial concepts have been applied to other areas such as

A comprehensive approach focused on sustainable change Asset Building and Community Development, Fourth Edition examines the promise and limits of community development by showing students and practitioners how asset-based developments can improve the sustainability and quality of life. Authors Gary Paul Green and Anna Haines provide an engaging, thought-provoking, and comprehensive approach to asset building by focusing on the role of different forms of community capital in the development process. Updated throughout, this edition explores how communities are building on their key assets—physical, human, social, financial, environmental, political, and cultural capital— to generate positive change. With a focus on community outcomes, the authors illustrate how development controlled by community-based organizations provides a better match between assets and the needs of the community.

Barchester Towers, published in 1857, is the sequel to Trollope's *The Warden* and continues the story of the clerical doings in the fictional cathedral town of Barchester. As this novel opens, the old Bishop of Barchester lies dying, and there is considerable doubt as to who will replace him. The Bishop's son Dr. Grantly, the Archdeacon, has high hopes of succeeding him, but these hopes are dashed and a new Bishop, Dr. Proudie, is appointed. Along with Dr. Proudie comes his domineering wife and their ambitious chaplain the Reverend Mr. Slope. The old clerical party headed by Dr. Grantly and the new, championed by Mrs. Proudie and Mr. Slope, are soon in contention over Church matters. These two parties represent a then-significant struggle between different evangelical approaches in the Church of England. One local issue in particular is fought over—the appointment of a new Warden for Hiram's Hospital, the focus of the preceding book. Mrs. Eleanor Bold is the daughter of Mr. Harding, the prior Warden. She has recently been widowed. The wealth she inherited from her late husband makes her an attractive match, and her affections are in contention from several prospective suitors, including the oily Mr. Slope. All of this lends itself to considerable humor and interest. Though not well received by critics on its initial publication, *Barchester Towers* is now regarded as one of Trollope's most popular novels. Together with *The Warden*, it was made into a very successful television series by the BBC in 1982. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more
