With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points Comprehensive, new edition bringing ophthalmologists up to date with the latest developments in clinical ophthalmology Each chapter deals with separate part of the eye Features 3750 full colour images and illustrations Includes more than 600 additional photographs Original images replaced

with high quality new versions Previous edition published in 2006

- This compact pocket edition of clinical ophthalmology explains and depicts various common and uncommon diseases and disorders in ophthalmology through very useful photographs - Includes a wide spectrum of pictures to enable students recognize the diseases that start from the eyelids to the retina and cause ocular injuries - It will assist all ophthalmologists and postgraduate trainees by serving as a ready reference during busy clinical schedules - Helps to clearly understand what is described theoretically in the textbook in general and covers depictive aspects showing diseases of the conjunctiva, uvea, lens, vitreous and retina, optic nerve, the orbit lacrimal apparatus, glaucomas, anterior chamber and pupillary abnormalities, motility disturbance and squint.

Everything You Need to Make Quick, Accurate Clinical Diagnoses of Ocular Diseases Clinical Ophthalmology Atlas is a time-saving, highly accurate resource designed to aid in the diagnosis and treatment of all types of ocular disease. This comprehensive volume covers the full spectrum of common and uncommon eye diseases, identifying and describing each disorder with more than 2,000 high-quality, full-color photographs and concise, clinically-relevant text.

This is a collection of photographs compiled by the author during his years of working as a surgeon and lecturer at Katurba Medical College. They show the extreme conditions of disease with which the patient presents before surgery. Each photo is described, the cause of the disease is explained, and the surgical treatment is suggested. There are 250 photos in full colour spread across 14 chapters, dealing with head and neck diseases, through all body systems, as well as more specialised unique conditions. This book will be useful to all surgical trainees and practising surgeons.

Illustrated Guide to Cardiovascular Disease is an extensive and highly visual guide, encompassing the full spectrum of cardiovascular diseases, along with cardiac anatomy and physiology. This book is divided into 58 chapters across seven sections. Each section covers a different disease or group of heart diseases, including coronary artery disease, heart failure and cardiomyopathy, valvular heart disease, pericardial disease, congenital heart disease, cardiac arrhythmias, peripheral vascular disease, and a final section on miscellaneous cardiovascular diseases. Each chapter features detailed discussion on common and uncommon conditions and their pathology, with the latest therapies in cardiology and European and American guidelines highlighted throughout the book. More than 1700 full colour images, illustrations, figures, flow charts and tables enhance Illustrated Guide to Cardiovascular Disease, an invaluable resource for all cardiologists. Extensive illustrated guide to a vast range of cardiovascular diseases Seven sections covering specific diseases and groups of diseases 1700 images in full colour Edited by Glenn N Levine, Director of the Michael E DeBakey Medical Centre in Houston, Texas

This Color ATLAS covers the various common and not so common corneal diseases in ophthalmology which are faced by all level of ophthalmologists. Over 600 photographs, shot from various angles spreading over 12 chapters have been included to identify the common conditions starting from congenital anomalies to contact lens-related corneal disorders. It starts with the chapter on Evaluation and Slit lamp examination of the cornea. It ends with the diseases of the sclera which is equally important to a cornea specialist. The textual outline next to each photograph is concise and lucid, and also includes the treatment outline in each case. This book is intended to create a photographic bridge between the undergraduates, postgraduate trainees, fellows and comprehensive ophthalmologists. This will serve as a pocket ready reckoner in cornea in common as well as rare clinical situation.

The Vocabulary Builder is a unique, creative and original book. It organizes words into chapters by sectors and provides origins of ophthalmic words for easy recall and interesting reading. The fourth edition of this Dictionary is well illustrated and written with easy to understand definitions. The book is oriented for fast delivery of meaning and definitions, with the emphasis on simplicity and practicality. It is definitely not a reference tome to give impressive weight to an ophthalmic word and syndrome in a costly compendium. We have prepared a practical book whose function, at the bottom line, is to assist in communication and to help develop vocabulary. A new chapter on refractive surgery has been added to this rapidly expanding subspecialty. Imaging words such as OCT have been added. This ophthalmic dictionary is useful for ophthalmologist and ophthalmic Assistant.
