Among the Jewish writers who emigrated from Eastern Europe to France in the 1910s and 1920s, a number chose to switch from writing in their languages of origin to writing primarily in French, a language that

represented both a literary center and the promises of French universalism. But under the Nazi occupation of France from 1940 to 1944, these Jewish émigré writers—among them Irène Némirovsky, Benjamin Fondane, Romain Gary, Jean Malaquais, and Elsa Triolet—continued to write in their adopted language, even as the Vichy regime and Nazi occupiers denied their French identity through xenophobic and antisemitic laws. In this book, Julia Elsky argues that these writers reexamined both their Jewishness and their place as authors in France through the language in

which they wrote. The group of authors Elsky considers depicted key moments in the war from their perspective as Jewish émigrés, including the June 1940 civilian flight from Paris, life in the occupied and southern zones, the roundups and internment camps, and the Resistance in France and in London. Writing in French, they expressed multiple cultural, religious, and linguistic identities, challenging the boundaries between center and periphery, between French and foreign, even when their sense of belonging was being violently denied.

**Manual** This book argues against the dominant historical view that Ottoman Armenians were united in resisting empire. Drawing on underused Armenian sources and archives, Richard Antaramian reveals the critical role the Armenian Church and clergy played in the implementation of the Ottoman state's reform efforts during the mid-nineteenth century Tanzimat era. Antaramian rethinks conceptions of the Ottoman state in terms of center and periphery, offering a networked model of empire in its place. This orients us to a view of a more dynamic political space, which has

This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of "yield management" in the

Commercial airline industry  
down to more recent  
successes of markdown  
management and dynamic  
pricing, the application of  
mathematical analysis to  
optimize pricing has become  
increasingly important  
across many different  
industries. But, since  
pricing and revenue  
optimization has involved  
the use of sophisticated  
mathematical techniques, the  
topic has remained largely  
inaccessible to students and  
the typical manager. With  
methods proven in the MBA  
courses taught by the author  
at Columbia and Stanford  
Business Schools, this book  
presents the basic concepts

Manual of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. This book provides an accessible introduction to the field, with less emphasis on technical details. Whilst this book does not provide a traditional history of nanoscience, instead it uses simple explanations and case studies as vehicles to explain key discoveries and the importance of them, enabling readers without a background in the area to gain an understanding of

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the

An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she

Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to
