The student workbook is design to help the user retain key chapter content. Included within this resource are chapter objective questions, key term definition queries, multiple choice, fill in the blank, and true or false problems. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A smart collection of additional review questions and practise problems to further reinforce basic concepts. The laboratory manual section includes about 30 basic experiments which concentrate more on radiographic factors which affect the quality of the resulting radiograph. Readers with a weaker math/science background will appreciate the remediation sections, and "self-tests" conclude each section to gauge the reader's weaknesses.
