This book applies the simple hair stroke patterns from my first e-book "Microblading Patterns: The Beauty Of Simplicity". Using those simple patterns, I created 30 brows styles for you to use in your real work on clients. There are three male brows styles, and the rest are female. The main objective of this book is to show you how easy it is to create beautiful brows styles by using simple hair stroke patterns. I show you step by step with drawings on computer first before I go on to show you how to simulate the steps on latex skin. In many examples, I use both left and right hands to help right-handed and left-handed artists to see how I create the brows. Another objective is that you will save a lot of money on training! Even though this book does not replace practical training, it does help you practice and learn on your own. You need to try to push yourself to think and do it all on your own. If you run into frustration, join my Facebook group to get help: Free PMU & Microblading Worldwide. If you still feel you need training after trying on your own and with others' help, then it's not too late to spend some money on classes. And I do offer classes too. So contact me if you want to train with me!
