He completed his clinical training as a resident at Norwalk Hospital, Norwalk ...

Sphingolipids are fundamental to the structures of cell membranes, lipoproteins, and the stratum cornea of the skin. Many complex sphingolipids, as well as simpler sphingoid bases and derivatives, are highly bioactive as extra- and intracellular regulators of growth, differentiation, migration, survival, senescence, and numerous cellular responses to stress. This book reviews exciting new developments in sphingolipid biology/sphingolipidology that challenge our understanding of how multicellular organisms grow, develop, function, age, and die.

This four-volume laboratory manual contains comprehensive state-of-the-art protocols essential for research in the life sciences. Techniques are presented in a friendly step-by-step fashion, providing useful tips and potential pitfalls. The important steps and results are beautifully illustrated for further ease of use. This collection enables researchers at all stages of their careers to embark on basic biological problems using a variety of technologies and model systems. This thoroughly updated third edition contains 165 new articles in classical as well as rapidly emerging technologies. Topics covered include: * Cell and Tissue Culture: Associated Techniques, Viruses, Antibodies, Immunocytochemistry (Volume 1) * Organelle and Cellular Structures, Assays (Volume 2) * Imaging Techniques, Electron Microscopy, Scanning Probe and Scanning Electron Microscopy, Microdissection, Tissue Arrays, Cytogenetics and In Situ Hybridization, Genomics and Transgenic Knockouts and Knock-down Methods (Volume 3) * Transfer of Macromolecules, Expression Systems, Gene Expression Profiling (Volume 4) * Indispensable bench companion for every life science laboratory * Provides the latest information on the plethora of technologies needed to tackle complex biological problems * Includes numerous illustrations, some in full color, supporting steps and results

No. 2, pt. 2 of November issue each year from v. 19 (1963)-47 (1970) and v. 55 (1972)- contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology, 3d (1963)-10th (1970) and 12th (1972)-

New developments in mass spectrometry have allowed routine identification and lowered limits of detection at levels only imagined a decade ago. Thousands of contaminants and residues in the food supply and the environment are now being reported. Between 2005 and 2010, more than 5,000 publications covering TOF-MS and environmental and food analysis were published, showing the importance of the technique in these applications. This book covers the basic principles of method development in GC- and LC-TOF-MS as well as the main operational parameters related to TOF-MS. The second part focuses on the relevant environmental applications, including quality control aspects as well as data collection. The third part is devoted to relevant applications in food analysis, including validation procedures for screening analysis as well as relevant databases. Outlines basic concepts and principles of gas and liquid chromatography TOF-MS and its application in food analysis Includes quality control and data collection techniques Focuses on environmental implications and safety concerns

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

A compact reference provides overviews for nearly one thousand schools in a variety of disciplines, in a resource that features listings by state and field of study as well as up-to-date entries on everything from enrollment and tuition to faculty and degrees offered. Original.

This volume contains the papers presented at RECOMB 2010: the 14th Annual International Conference on Research in Computational Molecular Biology held in Lisbon, Portugal, during April 25 – 28, 2010. The RECOMB conference series was started in 1997 by Sorin Istrail, Pavel Pevzner, and Michael Waterman. RECOMB 2010 was hosted by INESC-ID and Instituto Superior Tecnico, or- nized by a committee chaired by Arlindo Oliveira and took place at the Int- national Fair of Lisbon Meeting Centre. This year, 36 papers were accepted for presentation out of 176 submissions. The papers presented were selected by the Program Committee (PC) assisted by a number of external reviewers. Each paper was reviewed by three members of the PC, or by external reviewers, and there was an extensive Web-based discussion over a period of two weeks, leading to the ?nal decisions. RECOMB 2010 also introduced a Highlights Track, in which six additional presentations by senior authors were chosen from papers published in 2009. The RECOMB conference series is closely associated with the Journal of Computational Biology, which traditionally publishes special issues devoted to presenting full versions of selected conference papers.

Across civilizations and over the ages, attractive plant variation has been assembled and organised into gardens for aesthetics and recreation. In India, interest in gardening has increased progressively, particularly among the ' home gardeners ' . In 14 chapters, ' Ornamental Plants for Gardening ' documents the myriad variation available in diverse categories of ornamentals plants (annuals; roses; chrysanthemums; tuberose; bulbous plants; shrubs & climbers; cactus & succulents; hedges, edges, topiary & bonsai; and turf grass) for enhancing the attractiveness of both small and large gardens. Theoretical and practical guidance is provided about varieties; soil bed preparation; cultural practices; irrigation; fertilization; disease, pest and weed control; preservation of seeds & other forms of propagation units. Each chapter has been authored by expert/s in the relevant area and bears the seal of authenticity. It is our hope that the book will meet the information requirements of the academic community, students and all those interested in practical gardening.
