between identity and location. They take as their starting point Iceland and Horn's evolving experiences there, illustrated in watercolors, photographs, typographic drawings, and text. "Doubt Box" is the ninth book in the set, printed in a limited edition of 1,000 copies, and it comes in the form of a collection of 28 loose two-sided images printed on cards, which makes for 56 color reproductions. One face of each shows the glacial river Skafta, proverbially both changing and constant. The other shows any of a collection of possibilities--a boy, an iceberg, birds. Each card offers a hybrid, a composite, while together they suggest the universality of duality, and particularly the dual nature of identity.

How do strangers become friends? Ofelia Castillo is searching for a story. While her friends leave their boring Florida town for summer camps and family vacations, she braces for zero excitement. Lane Disanti would like her whole family to kick rocks. Especially her parents, who sent her to live with her grandmother for the summer while they finalize their divorce. Aster Douglas has one summer to figure out how to be a kid. She's been homeschooled by her grandfather her whole life, and it's easier for her to make a soufflé than a friend. CCat Garcia is hiding a big secret. She's in need of a new troop after she quits the Floras, her local Scouts, without her mother knowing. When fate and longing bring the girls together, it isn't love at first sight. But they soon bond over a shared mission to get the Floras to ditch an outdated tradition. In their quest for justice, independence, and an unforgettable summer, the girls form their own troop and find something they didn't know they needed: sisterhood.

Robert Burleigh's narrative nonfiction picture book follows a hummingbird ' s migration south for the winter, with stunning art by Wendell Minor. When the last summer flowers open their petals to the sun, it ' s time for a tiny ruby-throated hummingbird to dip its beak into the heart of each bloom, extracting as much nectar as possible before the hard trip ahead. Today is the day Tiny Bird begins its amazing journey south for the winter, traveling as fast as thirty miles an hour for hundreds of miles on end. The trip is long, with savage weather and many predators along the way, but Tiny Bird is built for this epic journey and eventually arrives at its winter home. This inspiring migratory and life cycle story celebrates the important and impressive feat of a small but mighty creature. Christy Ottaviano Books
