to the threat of nuclear warfare, it was the world's first IFV, providing the infantry squad with unprecedented firepower, mobility and protection. With over 55,000 manufactured since 1966, the BMP is also numerically one of the most important armoured vehicles ever built. This richly illustrated book examines the development and design of the BMP, detailing its armaments, performance in combat and variants.

In the mid-1960s, the Soviet Union unveiled the BMP, the first true infantry fighting vehicle. A revolutionary design, the BMP marked a significant departure from the traditional armoured personnel carrier, with a lower silhouette and heavier armament than rival APCs. One of the most fearsome light-armoured vehicles of its day, it caused great consternation on the other side of the Iron Curtain as the Americans scrambled to design a machine to rival the BMP. The result was the M2/M3 Bradley. These Cold War icons first clashed – not on the plains of Europe, but in southern Iraq during the Gulf War of 1991. Featuring specially commissioned full-colour artwork, this is the absorbing story of the origins, development and combat performance of the BMP and Bradley, culminating in the bloody battles of the Gulf War.

44 illustrations of the "Little Willie" (1915), Rolls Royce armored scout car (1916), German Panzer III (1940), American M4 Sherman tank (1942), more Captions.

Since the collapse of the Soviet Union, Russia's army has undergone a turbulent transformation, from the scattered left-overs of the old Soviet military, through a period of shocking decay and demoralization, to the disciplined force and sophisticated 'hybrid war' doctrine that enabled Vladimir Putin to seize Crimea virtually overnight in 2014. Using rare photographs and full colour images of the army in action, profiles of army leaders and defence ministers, as well as orders of battle and details of their equipment and dress, this is a vivid account of the army's troubled history and of its current character, capabilities and status. Written by an internationally respected author with remarkable access to Russian-language sources and veterans, this study is essential reading for anyone wishing to understand the growing power of Russia's military.

"My fellow Americans, I'm pleased to tell you today that I've signed legislation that will outlaw Russia forever. We begin bombing in five minutes. †? – Ronald Reagan, 1984. With these words, spoken as a sound check to a radio broadcast, President Reagan came dangerously close to igniting the long-simmering Cold War. Although Soviet forces were placed on alert following reports of this comment, the full-scale conflict between the West and the Soviet Bloc did not break out. Cold War Gone Hot, the latest companion volume for Force on Force, looks at the 44-year history of the Cold War and asks: "what if? †?
