Diploma Thesis from the year 2018 in the subject Business economics - Supply, Production, Logistics, grade: 1, University of the Aegean, language: English, abstract: Current logistics operations and information systems used cannot deal with the emerging challenges. Globalization, e-commerce, cyberthreats, cumbersome organizational structures, startups disrupting the business landscape and constantly higher customer demands push companies into adopting emerging technologies which enable them to increase digitalization and automation. The fourth industrial revolution enables companies to proceed in digitalizing their operations, as building a flexible organizational structure is a challenge that needs to be addressed and adopting the digital enterprise model is a crucial step before implementing the new age technologies, as companies must add the elements of flexibility and adaptability in order to deal with the challenges at hand. Logistics 4.0, a term derived from the combination of Industry 4.0 technologies and innovations and their application on inbound and outbound logistics is a narrower concept than Industry 4.0, as it focuses on typical features, such as automation and digitalization. The technologies most commonly utilized are the Internet of Things, Big Data analytics, Augmented Reality, Unmanned Aerial Vehicles and Advanced Robotics. IoT is the pinnacle of those technologies, as it enables new data streams creation from sources previously being non-exploitable and allows companies to monitor and control mechanizations, fleets etc. by a central system. The Master thesis presents a framework that companies may follow for a Logistics 4.0 technologies implementation. The framework presents five necessary phases for the implementation, enabling the company to properly deal with the challenges that emerge. Resistance to change, high investment costs, HR-related issues, data privacy issues, IT infrastructure requirements, the public's opinion about revolutionary technologies and regulations are challenges that must be dealt with for the implementation to be smoothly completed. The case studies analysis that follows showcase the advantages and benefits of implementing Logistics 4.0 technologies. Finally, the outcome of the Master thesis is that the framework may be tested in a real-world environment for further research on the subject.

Venture deeper into the heart of the classic bestselling novel Redeeming Love with this six-week study and discover life-changing Bible truths. Through Redeeming Love, millions of readers have experienced the captivating love story of Angel and Michael Hosea that illustrates God's power to redeem even the most lost among us. Redeeming Love: The Companion Study invites you to enter more fully into both the classic novel's eternal message and the biblical story that inspired its writing. Each week's readings include: - a personal reflection by Francine Rivers about the writing of Redeeming Love and the power of God's Word - key scenes from Redeeming Love, selected to illustrate God's loving pursuit of you - Bible study lessons that creatively blend story and Scripture to glean fresh insights - thoughtful reflection questions designed to inspire you to a deeper experience of God Perfect for both individual reflection and group discussion, this study will draw you deeper into the life-transforming love celebrated in Redeeming Love.

An accessible explanation of climate change summarizes its science while sharing insights into its implications for the future, answering key questions from the role of fossil fuels to the economic costs of reducing carbon emissions.

A witty and romantic novel of Regency love, family and appalling scandal, from a latter-day Jane Austen When their strait-laced, domineering father, Sir Clement Carnell, dies, Valentine throws open their Devonshire estate of Pennacombe to their fashionable cousins from London and Louisa feels free at last to reject the man Sir Clement wanted her to marry. Soon, the temptations of Regency London beckon, including the beautiful, scandalous, and very married Lady Harriet Eversholt, with whom Valentine becomes dangerously involved. Meanwhile, Louisa finds that freedom of choice is as daunting as it is exciting. Will the opportunity to indulge in a little folly lead to fulfillment or disaster? A Little Folly is a novel to make Jane Austen proud and Georgette Heyer envious. An acclaimed author of historical fiction, Jude Morgan weaves together the very best of Regency era writing with "refreshingly original characters, an intriguing plot, and an elegantly ironic style." (RT Book Reviews on Indiscretion). In this exciting new novel, Morgan delivers a story that, yet again, will bring cheers from critics and readers alike.

LIKE CLASS NOTES: ONLY BETTER. The Princeton Review's ASAP World History is designed to help you zero in on just the information you need to know to successfully grapple with the AP test. Handbook of Materials Failure Analysis: With Case Studies from the Oil and Gas Industry provides an updated understanding on why materials fail in specific situations, a vital element in developing and engineering new alternatives. This handbook covers analysis of materials failure in the oil and gas industry, where a single failed pipe can result in devastating consequences for people, wildlife, the environment, and the economy of a region. The book combines introductory sections on failure analysis with numerous real world case studies of pipelines and other types of materials failure in the oil and gas industry, including joint failure, leakage in crude oil storage tanks, failure of glass fibre reinforced epoxy pipes, and failure of stainless steel components in offshore platforms, amongst others. Introduces readers to modern analytical techniques in materials failure analysis Combines foundational knowledge with current research on the latest developments and innovations in the field Includes numerous compelling case studies of materials failure in oil and gas pipelines and drilling platforms
