Bradley vs BMP, Desert Storm 1991 was the second in Osprey's Duel series to deal with the Gulf War. This one focuses upon the armored fighting vehicles (AFV) of the American and Iraqi forces the Bradley and BMP respectively. Like all the Duel books this one follows the same format. First it breaks down the two vehicles, then the opposing forces, and then the combat.

MUSINGS ON IRAQ: Review Bradley vs BMP, Desert Storm 1991

The Bradley could identify their target at more than 3,000 meters compared to the BMP-1 best night time acquisition of 400 meters, enhanced to 900 meters if they used a infrared searchlight. The Iraqi BMPs were hampered by poor maintenance, but more than that, the Bradley had the advantage of following the rule of mechanized warfare.

Review: Bradley vs BMP Desert Storm 1991 | IPMS/USA Reviews

These Cold War icons first clashed - not on the plains of Europe, but in southern Iraq during the Gulf War of 1991. Featuring specially commissioned full-colour artwork, this is the absorbing story of the origins, development and combat performance of the BMP and Bradley, culminating in the bloody battles of the Gulf War.

Bradley vs BMP: Desert Storm 1991. In the mid-1960s, the Soviet Union unveiled the BMP-1, the first true “infantry fighting vehicle.”. A revolutionary design, the BMP marked a significant departure from the traditional “armored personnel carrier,” sporting a lower silhouette and a higher-caliber armament than rival APCs.

The result was the M2 Bradley; however, the American type seemed to be at an immediate disadvantage, with a higher profile, lighter armaments, and a lack of speed compared to the BMP. This book examines the first time these Cold War icons clashed—not on the plains of Europe, but in the deserts of southern Iraq during the first Gulf War.

The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m the M1 Abrams is, to this day, a veritable fighting machine. Superior to both Iraq's Soviet era T-55 and T-62 tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991, where it was to be confronted by its archenemy the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of mobility, protection and firepower. By the time of Operation Desert Storm, however, the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews. In this fascinating study, Steven Zaloga pits these two great fighting machines against one another, plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait.

CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

If ever there were an armored fighting vehicle that today's soldier could love, it would be the Bradley: of 2,200 that muscled through Operation Desert Storm, only three were disabled. In a full-scale, fully detailed look at the M2/M3 Bradley Fighting Vehicle System, Michael Green, veteran

writer on military machines and tour guide at a tank museum, and co-author James D. Brown conduct readers through the nuts and bolts, production history, and wartime work of the stalwart Bradley. Made to carry infantry squads safely to critical points on the battlefield and to perform cavalry scout missions, the Bradley is uniquely able to close in on and destroy enemy forces in support of mounted and dismounted infantry and cavalry combat operations. It also, as recent experience demonstrates, provides a high degree of battlefield survivability. Unlike the M113 family it replaced, however, the Bradley is no mere "battle taxi." With the 25mm automatic cannon as its main armament and a coaxial 7.62mm machine gun, the Bradley is capable of defeating the majority of armored vehicles it is likely to encounter on the battlefield. With pictures, diagrams, details of weaponry, and accounts of action, this book about the M2/M3 Bradley gives readers a real sense of how much this hardworking vehicle has contributed to American fighting power in recent years.

Designed following the relatively poor performance of America's multi-role fighters during the Vietnam War, the F-15 Eagle was conceived as a dedicated air superiority fighter. But, having trained for 15 years in the Eagle it wasn't Eastern Bloc operated MiGs that the F-15 eventually came up against, but pilots of Saddam Hussein's Iraqi airforce. This book analyses the combat between the American and Soviet 'Cold War fighters' in a balanced manner, examining how the technical abilities of the aircraft combined with the different levels of training available to opposing pilots and groundcrews allowed the F-15s to destroy the Iraqi offensive

abilities within weeks of the First Gulf War starting. Packed with artwork, illustrations and photographs, this book places the reader in the cockpit during one of the last major dogfighting air wars in modern history.

Designed for the battlefields of Europe at the height of the Cold War, the M60 and T-62 were the premier combat tanks of their day. However, it was in the deserts of the Middle East that they finally met in battle. This new Duel title examines the design and development of these main battle tanks, identifying their strengths and weaknesses, and describing and analyzing their performance on the battlefield during the Yom Kippur War, the Iran–Iraq War, and the first Gulf War.

One of the most sophisticated armoured fighting vehicles in the world, the M2/M3 Bradley is the United States equivalent of the British Warrior, combining the role of personnel carrier with the formidable armament of a 25mm cannon and TOW anti-tank missiles. With a maximum road speed of 66kmh it also has a degree of manoeuvrability dreamed of by other armoured vehicles. In this book Steven Zaloga examines the different variants of the Bradley in detail and looks at the changing tactical requirements of the US Army for an armoured personnel carrier.
