What can the human brain and its relationship to the internet tell us about our society, our technologies, and our businesses? A lot, as it turns out. The internet today is a virtual replica of the brain, and the networks that leverage it grow and collapse in ways that are easily predictable if you understand the brain and

Access PDF Breakpoint Why The Web Will Implode

other biological networks. We're living in the midst of a networking revolution. All of the major technology innovations of the 21st century – social networking, cloud computing, search engines, and crowdsourcing, to name a few – leverage the internet and are thus bound by the rules of networks. We've seen the

Access PDF Breakpoint Why The Web Will Implode

exponential growth of these technologies, and they've led to a more efficient and tightly connected world. But what many people don't realize is that all networks eventually reach a breakpoint and collapse. This happens in the brain, it happens in nature, it happened to MySpace, and it will happen to Facebook

Access PDF Breakpoint Why The Web Will Implode

and Google. It is critical to understand where the breakpoint is in the networks you use in order to achieve optimum success. Navigating the world of new technologies today can be like walking through a minefield unless you know the path. Imagine what you could do with a roadmap for where things are headed? In

Access PDF Breakpoint Why The Web Will Implode

this fascinating look at the future of business and technology, neuroscientist and entrepreneur Jeff Stibel shows how the brain can act as a guide to understanding the future of the internet and the constellation of businesses and technologies that run on it. He'll show how leaders like Marissa Mayer are using

artificial intelligence to literally remake
Yahoo! and how startups like oDesk and
Kickstarter are using crowdsourcing, the
next wave of revolutionary technology, to
create something much larger and
"smarter" than the sum of their parts.

Stibel offers a fresh perspective about the
future of business and technology in a

Explains how the internet of today largely mimics the networks of the human brain, revealing how an understanding of the brain and other biological networks can help business professionals to make informed predictions about the growth and

loyal. So when he's recruited by a new combat unit, Dallas is none too pleased to find himself teamed up with the icy blond JAG officer who nearly court-martialed his friends. Academy graduate Julianne Decatur is tough, tenacious, and driven by her belief in military law. She has zero patience for hot shot Spec-Ops cowboys

who think the rules don't apply to them, and even less tolerance for Dallas' tough-as-nails Texas attitude. But when they're assigned to investigate a Navy flyer's apparent suicide, they discover the trail of a ruthless killer with a secret to hide—and an attraction between them that can't be denied. And when their prey turns the
