From award-winning musician and composer Warren Ellis comes the unexpected and inspiring story of a piece of chewing gum. Featuring an introduction from Nick Cave. 'Warren has turned this memento, snatched from his idol's piano in a moment of rapture, into a genuine religious artefact.' NICK CAVE 'In praise of meaning-rich relics and magical things. Totally heartwarming project.' MAX PORTER 'A unique study of a fan's devotion, of transcendence and of the artistic vocation - it's got depth and great warmth. It's a beautiful piece of work.' KEVIN BARRY On Thursday 1 July, 1999, Dr Nina Simone gave a rare performance as part of Nick Cave's Meltdown Festival. After the show, in a state of awe, Warren Ellis crept onto the stage, took Dr Simone's piece of chewed gum from the piano, wrapped it in her stage towel and put it in a Tower Records bag. The gum remained with him for twenty years; a sacred totem, his creative muse, growing in significance with every passing year. In 2019, Cave - his collaborator and great friend - asked Warren if there was anything he could contribute to display in his Stranger Than Kindness exhibition. Warren realised the time had come to release the gum. Together they agreed it

should be housed in a glass case like a holy relic. Worrying the gum would be damaged or lost, Warren decided to first have it cast in silver and gold, sparking a chain of events that no one could have predicted, one that would take him back to his childhood and his relationship to found objects. Nina Simone's Gum is about how something so small can form beautiful connections between people. It is a story about the meaning we place on things, on experiences, and how they become imbued with spirituality. It is a celebration of artistic process, friendship, understanding and love.

This book provides a review of the theoretical, empirical, and instructional issues in the field of college reading and study strategies through a careful and systematic examination of the relevant literature. The articles and their authors are, as follows: (1) "Vocabulary Acquisition and the College Student" (Michele L. Simpson and Edward J. Dwyer); (2) "Teacher-Directed Comprehension Strategies" (Sherrie L. Nist and Donna L. Mealey); (3) "Textbook Study Strategies" (David C. Caverly and Vincent P. Orlando); (4) "The Value of Taking Notes During Lectures" (Thomas H. Anderson and Bonnie B. Armbruster); (5) "External Factors That Influence Study" (Victoria J. Risko and others); (6) "Internal Factors That Influence Study" (Victoria J. Risko and others); and (7) "Preparing for and Taking Tests" (David M. Wark and Rona F. Flippo). (KEH)

Do you want your students to just take psychology or to experience psychology? Experience Psychology is a complete learning system that empowers students to personally, critically, and actively experience the impact of psychology in everyday life. Experience Psychology is about, well, experience--our own behaviors; our relationships at home and in our communities, in school and at work; and our interactions in different learning environments. Grounded in meaningful real-world contexts, Experience Psychology's contemporary examples, personalized author notes,

and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially--by reading, seeing, and doing. With the Experience Psychology learning system, students do not just "take" psychology but actively experience it. Experience a Personalized Approach How many students think they know everything about introductory psychology but struggle on the first exam? LearnSmart, McGraw-Hill's adaptive learning system, pinpoints students' metacognitive abilities and limitations, identifying what they know--and more importantly, what they don't know. Using Bloom's Taxonomy and a highly sophisticated "smart" algorithm, LearnSmart creates a personalized, customized study plan that's unique to each individual student's demonstrated needs. With virtually no administrative overhead, instructors using LearnSmart are reporting an increase in student performance by a letter-grade or more. Throughout Experience Psychology, students find a wealth of personal pedagogical "asides" directly from Laura King to guide their understanding and stimulate their interest as they read. Some of these helpful notes highlight crucial terms and concepts; others prompt students to think critically about the complexities of the issues; other notes encourage students to apply what they have learned to their prior reading or to a new situation. These mini-conversations between author and students help develop analytical skills for students to carry and apply well beyond their course. Experience an Emphasis on Critical Thinking Experience Psychology stimulates critical reflection and analysis. Challenge Your Thinking sidebar features involve students in debates relevant to findings from contemporary psychological research. Thought-provoking questions encourage examination of the evidence on both sides of a debate or issue. Also oriented toward critical thought are the text's Intersection selections. Showcasing studies in different areas of psychological research that are being conducted on the same topic, the Intersections shed light on the links between, and the reciprocal influences of, this exciting work, and they raise

provocative questions for student reflection and class discussion. The new Psychological Inquiry feature encourages and guides analysis and interpretation of figures and photos by embedding a range of critical thinking questions in selective captions. To help students master challenging concepts, Experience Psychology also includes a special section, "Touring the Brain and Nervous System," featuring detailed, full-color transparency overlays of important figures. Conceived and developed with the input of an expert in each specific area, the overlays offer hands-on practice in grasping key biological structures and processes that are essential to success in the course. A feature called Apply It to Our World links the subject matter of the transparency overlays to common real-life situations such as the fear of spiders. On-page assessment questions and answers, as well as critical thinking questions, accompany each figure. Experience an Emphasis on Active Engagement With the new Experience It! feature, students can use their mobile devices to practice and master key concepts wherever and whenever they choose. By snapping easily located QR codes, students gain access to videos, Concept Clips, and related news articles, for a highly portable, rich, and immersive experience that powerfully reinforces the chapter reading. Through Do It!, a series of brief, reoccurring sidebar activities linked to the text reading, students get an opportunity to test their assumptions and learn through hands-on exploration and discovery. Reinforcing that the science of psychology requires active participation, Do It! selections include, for example, an exercise on conducting an informal survey to observe and classify behaviors in a public setting, as well as an activity guiding students on how to research a "happiness gene." Such exercises provide students with a vibrant and involving experience that gets them thinking as psychologists do. Experience Psychology helps students to perform to their maximum potential in and out of the classroom, fully engaging them in the content and experiences that comprise the world's most popular undergraduate major.

## A South American Lowland Cosmological Model

Bram Stoker kept secret a tale even more terrifying than Dracula. It begins among the Carpathian peaks, when an intrepid explorer discovers a mysterious golden box. She brings it back with her to the foggy streets of Victorian London, unaware of its dangerous power...or that an evil beyond imagining has already taken root in the city. Stoker, a successful theater manager but frustrated writer, is drawn into a deadly web spun by the wealthy founders of a mission house for the poor. Far from a safe haven, the mission harbors a dark and terrifying secret. To save the souls of thousands, Stoker--aided by the explorer and a match girl grieving the loss of her child--must pursue an enemy as ancient as the Saharan sands where it originated. Their journey will take them through the city's overgrown graveyards and rat-infested tunnels and even onto the maiden voyage of the world's first "unsinkable" ship...

In een vervallen gebouw komen drie meisjes bij bewustzijn. Eén van hen mag het huis niet levend verlaten. En ze moeten zelf kiezen wie... Bloedstollend!

One consequence of the popularity of the MBTI is that it has become increasingly detached from psychological type theory - often to the detriment of the individuals whom it is intended to benefit. Reconnecting the MBTI to type theory has critical practical implications and applications. In this regard, the overall goal of this edition is identical to that of the two editions that preceded it, and

indeed to that of the Indicator itself: to make the theory of psychological types described by Jung understandable and useful in people's lives.
