Take the guesswork out of BTEC assessment with sample student work and assessor feedback for all pass, merit and distinction criteria. By focusing on assessment this compact guide leads students through each pass, merit and distinction criterion by clearly showing them what they are required to do. Helps your students' to tackle the new exam with confidence with mock examination questions together with answers and feedback Provides a sample student answer for every single pass, merit and distinction criterion, together with detailed assessor's comments on how work can be improved, so that students know exactly what their work needs to show to hit their grade target Includes realistic model assignments that provide an opportunity to generate all evidence, with each criterion and grade clearly indicated. Supports students with detailed revision-style summaries of all the learning aims from the unit allowing them to quickly find the facts and ideas they will need for their assessment. Enables you to customise your course to the units you deliver when used alongside other guides in the series

Millions of Americans have to train others as part of their jobs. Whether you're an employee training your co-workers on a new process or skill, a volunteer asked to train new volunteers, a chef training your staff, or a paramedic giving CPR training, it's just as important to know how to teach others as it is to know what you're talking about. It doesn't matter how much you know about your subject if you can't share it with others. Fortunately, Training For Dummies offers all the nuts and bolts of training for anyone who has to educate others on any subject and in any field. It covers all the modern, interactive instructional methods and dynamic training approaches available and helps you get trainees inspired, involved, and enthused. Training For Dummies will help you: Keep it interesting so trainees learn more eagerly Master the jargon of training Use audio and visual aids effectively Prepare for the training certification process Evaluate your results and improve your tactics Elaine Biech, President and Managing Principal of Ebb Associates, Inc., and known as "the trainer's trainer" shows you all the tips and tricks of the trade. Based on her long experience as a trainer and her work for clients such as the IRS and many Fortune 500 companies, Biech helps you discover: Tips, techniques, and tidbits for enhancing your training sessions Methods that improve trainee participation Alternatives to the traditional lecture method Tactics for gauging and managing group dynamics Strategies for addressing problems in the classroom Hints for understanding and adapting to different learning styles Helpful resources and other extra material you can put to immediate use No matter what you do for a living, there will probably come a time when you have to teach others what you know. Training For Dummies cuts through the complicated jargon to present the basics of teaching and learning in straightforward, plain English so you can share your specialized knowledge with those who need it.

BTEC National for IT Practitioners: Systems Units has been written specifically to cover the systems pathway of the BTEC National specifications. This book caters for one of the most popular pathways in the BTEC National specifications, bringing together all the key specialist units for students who have chosen the systems route, including the core units specific to this pathway that aren't covered in the core unit book. When used alongside its companions for the core units and business pathways, this series delivers the most accessible and usable student textbooks available for the BTEC National. Units covered: Unit 11 – Data Analysis and Design Unit 22 – Network Management Unit 13 – Human Computer Interaction Unit 28 – IT Technical Support Unit 16 – Maintaining Computer Systems Unit 29 – IT Systems Troubleshooting and Repair Written by an experienced tutor, each unit is illustrated with assessment activities, end-of-chapter questions, case studies and practical exercises. The result is a clear, straightforward textbook that encourages independent study and acts as a reference to various topics within the qualification.

Exam Board: Edexcel Level: GCSE Subject: Business First Teaching: September 2017 First Exam: June 2019 Endorsed for Edexcel Let Ian Marcouse successfully steer you through the new specification with his proven and popular approach to Business; clear content coverage is enhanced by numerous real-life examples to create a course that engages, motivates and develops every student. - Breaks down the content of the 2017 specification into clear, accessible explanations of important concepts and theories - Helps students apply their knowledge to a range of real business examples, issues and contexts, supported by 'Talking Points' that encourage critical and commercial thinking - Improves quantitative, investigative, analytical and evaluation skills through end-of-chapter exercises - Builds students' confidence approaching their exams as they practise calculation, short answer and extended-writing questions with stimulus materials - Boosts students' vocabulary and supports revision with definitions of key terminology for each topic

This text provides all the necessary underpinning knowledge for the BTEC National IT Practitioners qualification. It offers: case studies to enable students to apply theory to vocational practice, portfolio builders providing activities and guidance, and IVA Advice on completing assignments.

This Revision Workbook delivers hassle-free hands-on practice for the externally assessed units.

Following on from Book 1, this student book covers the various options from BTEC National Business to ensure that students have almost everything they need to complete their Certificate or Diploma.

The aim of this book is to provide comprehensive coverage of topics in Unit 1 of the BTEC Level 3 course in Information Technology in an interesting and approachable manner. If you are studying this course, you need to notice, read about, experience and analyse the impact and implications of current and emerging digital technologies. Examples and case studies from scenarios and events that have recently been in the news are used to bring the subject to life. Reading and discussing articles from quality newspapers, whether printed or online, discussing relevant TV documentaries, noticing and analysing the use of digital technology in countless aspects of life, as well as learning from a textbook, are all going to contribute to a successful exam result. The book is divided into six sections corresponding to the six Learning Aims outlined in the specification, complementing each of the PG Online teaching resource packs. These sections are divided into between four and eight chapters, each containing material that can be covered in one or two lessons. The chapters have in-text questions which can be used as discussion points in a lesson. An extra chapter at the end of Learning Aim B on "Drawing System Diagrams" will be useful for students faced with a question on the exam for which they are required to draw such a diagram. In addition to almost 100 in-text questions and discussion points, there are over 80 end-of-chapter exercises that are designed to give practice in answering exam-style questions, using command words such as state, describe, explain, analyse. As much practice as possible is needed in answering such questions and getting feedback from the teacher so as to understand how to gain the maximum possible marks in the final exam.
