Many of the political problems of the Middle East and North Africa have geographic roots, but material and ideas on spatial relationships in the region have, until now, remained scattered and piecemeal. In this original work, Drysdale and Blake examine the ways in which the geography and politics of the region are intertwined, and focus on the evolution and deficiencies of the contemporary political map. Organized around the themes of partition and integration, the discussion covers such timely issues as the Arab-Israeli conflict, Arab unity, the civil war in Lebanon, regional petroleum development, strategic straits, and the Iran-Iraq war. Throughout, this unique book is richly illustrated with specially drawn maps and diagrams.

In Syria and the Middle East Peace Process, Alasdair Drysdale and Raymond A. Hinnebusch, two noted Middle East scholars, present the first detailed examination of Syria's role in the long struggle for an Arab-Israeli peace. They paint a surprising portrait of a county whose power is out of proportion to its size, economy, and resources. They explore the reasons behind this phenomemo most importantly, the Machiavellian brilliance of its leader, Hafez al-Asad. The authors address the origins of the Asad regime, Syria's strategy toward its Arab neighbors, its conflict with Israel, and the history of its relationships with the Soviet Union and the United States. The authors argue forcefully that Syrian involvement is vital in an effort to resolve the Arab-Israeli conflict.

A long list of countries - labelled outcasts, pariahs and rogues - have failed to meet international standards of good conduct. In the Cold War years Rhodesia, Israel, Chile, Taiwan and South Africa, among others, featured among the ranks of the disreputable. In modern world politics, the serious sinners not only include states: terrorists, rebels, criminals and mercenaries also participate in the great game of who gets what, when and how. Highlighting the rules of good behaviour that both state and non-state actors have violated, Geldenhuys takes a novel approach that breaks through the narrow parameters of the rogue state paradigm and of other state-centric perspectives.

Few studies of Middle East wars go beyond a narrative of events and most tend to impose on this subject the rigid scheme of superpower competition. The Gulf War of 1991, however, challenges this view of the Middle East as an extension of the global conflict. The failure of the accord of both superpowers to avoid war even once regional superpower competition in the Middle East had ceased must give rise to the question: Do regional conflicts have their own dynamic? Working from this assumption, the book examines local-regional constraints of Middle East conflict and how, through escalation and the involvement of extra-regional powers, such conflicts acquire an international dimension. The theory of a regional subsystem is employed as a framework for conceptualising this interplay between regional and international factors in Tibi's examination of the Middle East wars in the period 1967-91. Tibi also provides an outlook into the future of conflict in the Middle East in the aftermath of the most recent Gulf War.
