Players take it in turns to color 2 or 3 hexagons that total 15. A player could color 2 hexagons, e.g. 7 and 8 or a player could color 3 hexagons, e.g. 4, 5 and 6. The last player who colors a combination of 2 or 3 numbers that total 15 is the winner. VARIATIONS – Choose a different total to aim for instead of 15, e.g. try 10, 12 or 17.

You can use these printable counting and addition games with your favourite unit blocks to build math towers, supporting early math and fine motor skills. Math towers – block addition activity printables Early math skills need to focus on hands-on activities, where children [...]

An application of the techniques of dynamical systems and bifurcation theories to the study of nonlinear oscillations. Taking their cue from Poincare, the authors stress the geometrical and topological properties of solutions of differential equations and iterated maps. Numerous exercises, some of which require nontrivial algebraic manipulations and computer work, convey the important analytical underpinnings of problems in dynamical systems and help readers develop an intuitive feel for the properties involved.

Welcome to Ian Stewart's strange and magical world of mathematics! In Math Hysteria, Professor Stewart presents us with a wealth of magical puzzles, each one spun around an amazing tale: Counting the Cattle of the Sun; The Great Drain Robbery; and Preposterous Piratical Predicaments; to name but a few. Along the way, we also meet many curious characters: in short, these stories are engaging, challenging, and lots of fun!
