REPRINT. pp.200. B & W illustrations. This book is intended for the home craftsman who wants to make all sorts of things in wood from a table lamp to a rabbit hutch. To the tradesman carpentry refers to the constructional woodwork of a house-the roof, flooring, and so on. To the man in the street, however, it generally means the making of almost every thing in wood; hence the general character of the designs we give. We give a range of comparatively simple designs for objects to make which we know from experience to be in everyday demand; small general items, pieces of furniture, and garden woodwork. These are followed by instructions on the use of tools, and the everyday processes involved in woodwork-making doors, hinging, fitting locks, and cutting joints.

This two-volume series provides building craft students with complete coverage of the CGLI 585 syllabus to craft certificate level.

More than 40 fabulous projects and 1,200 step-by-step illustrations offer users information they need to become master woodworkers.

Part of the "Carpentry for Boys" series, this vintage book contains a course of lessons on elementary woodwork designed for children or teenagers that focuses on tools and their uses. Carpentry is a skilled trade where the main work performed is the shaping, cutting, and installation of building materials used for the things like ships, buildings, timber bridges, concrete formwork, etc. Written in clear, simple language and profusely illustrated, this book will be of considerable utility to those with a practical interest in woodwork and carpentry, and it would make for a fantastic addition to DIY collections. Contents include: "Use of the Hammer", "Use of the Gauge", "Measurement", "Use of the Try-square and the Bevel Slitting and Cutting-off Saws", "Use of Saws", "Surface Planing", "Edge and End Planing", "Use of the Bit and the Brad-Awl", etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this classic volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new introduction on wood working.

For woodworkers, hand tools put the emphasis on the process of woodworking rather than the result. Yet hand tools also are essential to the highest level of craftsmanship, bringing a refinement to work that machines alone cannot produce. Whether using hand tools alone as a source of pleasure, quality, or efficiency, or in combination with machines, woodworker can trust the information in Woodworking with Hand Tools, a collection of 35 articles from the experts at Fine Woodworking magazine. In Woodworking with Hand Tools, expert craftsmen explain how they choose, sharpen, and use every kind of hand tool. There's advice on tool maintenance, techniques for getting the most from the tools, and projects made using hand tools. With clear photographs, drawings, and step-by-step instructions, Woodworking with Hand Tools will be a useful and necessary resource for anyone who works wood.
