The Caterpillar C10 is 10.3 liter diesel engine used in trucks and buses. It was introduced in 1995 and was replaced by the Caterpillar C9 in 2004. The engine featured an Electronic Control Module (ECM) with ATA/SAE standard data links. The ECM boasted the ability for fleet managers to analyze how the vehicle and engine and determine the most ...

Figure 6-14 shows the location of EMS components on the C-10 and C-12 engines. Sensor location is similar for the C-15, except that boost and intake-manifold pressure sensors are on the left side forward rather than on the right.

Electronic management systems:Caterpillar EMS | electrical ...
• The engine may require a slightly longer period of time to start-up. The engine may run rough for a few seconds until the ECM determines the proper firing order by the use of the primary engine speed/timing sensor only. • The engine will start and the engine will run when only one sensor signal is present from either of the sensors.
