Since the time when interactive television emerged as a medium for the home environment, it has been permanently evolving. Changing requirements and user behavior, e.g., the demand for being mobile and have access to information and entertainment anywhere and anytime, are challenging interactive TV. New kinds of interactive services have to be conceived for the increasing mobile, ubiquitous requirements of the different user groups. In these changing environments, a better understanding of emerging contexts and their implications is essential. This gave birth to the idea for the theme of the EuroITV 2008 Conference: "Changing Television Environments." EuroITV 2008, the 6th edition of the European Conference on Interactive Television, was organized and hosted by the HCI and Usability Unit, ICT&S Center, University of Salzburg, Austria. The EuroITV Conference Series started at Brighton University in 2003 and 2004. It was followed by Aalborg University in 2005, Athens University of Economics and Business in 2006 and by CWI (Centrum Voor Wiskunde en Informatica) in Amsterdam 2007. We would like to thank all former Chairs for making this great conference series happen and for providing us with the opportunity to host EuroITV 2008.
