Deterrence as a strategic concept evolved during the Cold War. During that period, deterrence strategy was aimed mainly at preventing aggression against the United States and its close allies by the hostile Communist power centers--the Union of Soviet Socialist Republics (USSR) and its allies, Communist China and North Korea. In particular, the strategy was devised to prevent aggression involving nuclear attack by the USSR or China. Since the end of the Cold War, the risk of war among the major powers has subsided to the lowest point in modern history. Still, the changing nature of the threats to American and allied security interests has stimulated a considerable broadening of the deterrence concept. Post-Cold War Conflict Deterrence examines the meaning of deterrence in this new environment and identifies key elements of a post-Cold War deterrence strategy and the critical issues in devising such a strategy. It further examines the significance of these findings for the U.S. Navy and Marine Corps. Quantitative and qualitative measures to support judgments about the potential success or failure of deterrence are identified. Such measures will bear on the suitability of the naval forces to meet the deterrence objectives. The capabilities of U.S. naval forces that especially bear on the deterrence objectives also are examined. Finally, the book examines the utility of models, games, and simulations as decision aids in improving the naval forces' understanding of situations in which deterrence must be used and in improving the potential success of deterrence actions.

Winner of the 2018 American Academy of Diplomacy Douglas Dillon Award Shortlisted for the 2018 Duff Cooper Prize in Literary Nonfiction “[A] brilliant book...by far the best study yet” (Paul Kennedy, The Wall Street Journal) of the gripping history behind the Marshall Plan and its long-lasting influence on our world. In the wake of World War II, with Britain's empire collapsing and Stalin's on the rise, US officials under new Secretary of State George C. Marshall set out to reconstruct western Europe as a bulwark against communist authoritarianism. Their massive, costly, and ambitious undertaking would confront Europeans and Americans alike with a vision at odds with their history and self-conceptions. In the process, they would drive the creation of NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil's "thoroughly researched and well-written account" (USA TODAY) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil's gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin's determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil's account will forever change how we see the Marshall Plan. "Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War" (The New York Times Book Review), The Marshall Plan is a polished and masterly work of historical narrative. An instant classic of Cold War literature, it "is a gripping, complex, and critically important story that is told with clarity and precision" (The Christian Science Monitor).

Published to coincide with the twentieth anniversary of the fall of the Berlin Wall — a definitive and ground-breaking account of the revolutionary ideology that changed the modern world. The inexorable rise of Communism was the most momentous political phenomenon of the first half of the twentieth century. Its demise in Europe and its decline elsewhere have produced the most profound political changes of the last few decades. In this illuminating book, based on forty years of study and a wealth of new sources, Archie Brown provides a comprehensive history as well as an original and highly readable analysis of an ideology that has shaped the world and still rules over a fifth of humanity. A compelling new work from an internationally renowned specialist, The Rise and Fall of Communism promises to be the definitive study of the most remarkable political and human story of our times.

In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.

This new Handbook offers a wide-ranging overview of current scholarship on the Cold War, with essays from many leading scholars. The field of Cold War history has consistently been one of the most vibrant in the field of international studies. Recent scholarship has added to our understanding of familiar Cold War events, such as the Korean War, the Cuban Missile Crisis and superpower détente, and shed new light on the importance of ideology, race, modernization, and transnational movements. The Routledge Handbook of the Cold War draws on the wealth of new Cold War scholarship, bringing together essays on a diverse range of topics such as geopolitics, military power and technology and strategy. The chapters also address the importance of non-state actors, such as scientists, human rights activists and the Catholic Church, and examine the importance of development, foreign aid and overseas assistance. The volume is organised into nine parts: Part I: The Early Cold War Part II: Cracks in the Bloc Part III: Decolonization, Imperialism and its Consequences Part IV: The Cold War in the Third World Part V: The Era of Detente Part VI: Human Rights and Non-State Actors Part VII: Nuclear Weapons, Technology and Intelligence Part VIII: Psychological Warfare, Propaganda and Cold War Culture Part IX: The End of the Cold War This new Handbook will be of great interest to all students of Cold War history, international history, foreign policy, security studies and IR in general.

With a new preface by the author Controversial in nature, this book demonstrates that the United States did not need to use the atomic bomb against Japan. Alperovitz criticizes one of the most hotly debated precursory events to the Cold War, an event that was largely responsible for the evolution of post-World War II American politics and culture.

This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution in 1949 set the stage, Chen says. The Korean War, the Taiwan Strait crises, and the Vietnam War--all of which involved China as a central actor--represented the only major "hot" conflicts during the Cold War period, making East Asia the main battlefield of the Cold War, while creating conditions to prevent the two superpowers from engaging in a direct military showdown. Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with the collapse of the Soviet Empire and the decline of international communism. Based on sources that include recently declassified Chinese documents, the book offers pathbreaking insights into the course and outcome of the Cold War.

Offers information on the Korean War Veterans Memorial in Washington, D.C., presented by the National Park Service. Discusses the history of the memorial and provides access to images.

This open access volume surveys the state of the field to examine whether a fifth wave of deterrence theory is emerging. Bringing together insights from world-leading experts from three continents, the volume identifies the most pressing strategic challenges, frames theoretical concepts, and describes new strategies. The use and utility of deterrence in today's strategic environment is a topic of paramount concern to scholars, strategists and policymakers. Ours is a period of considerable strategic turbulence, which in recent years has featured a renewed emphasis on nuclear weapons used in defence postures across different theatres; a dramatic growth in the scale of military cyber capabilities and the frequency with which these are used; and rapid technological progress including the proliferation of long-range strike and unmanned systems. These military-strategic developments occur in a polarized international system, where cooperation between leading powers on arms control regimes is breaking down, states widely make use of hybrid conflict strategies, and the number of internationalized intrastate proxy conflicts has quintupled over the past two decades. Contemporary conflict actors exploit a wider gamut of coercive instruments, which they apply across a wider range of domains. The prevalence of multi-domain coercion across but also beyond traditional dimensions of armed conflict raises an important question: what does effective deterrence look like in the 21st century? Answering that question requires a re-appraisal of key theoretical concepts and dominant strategies of Western and non-Western actors in order to assess how they hold up in today's world. Air Commodore Professor Dr. Frans Osinga is the Chair of the War Studies Department of the Netherlands Defence Academy and the Special Chair in War Studies at the University Leiden. Dr. Tim Sweijs is the Director of Research at The Hague Centre for Strategic Studies and a Research Fellow at the Faculty of Military Sciences of the Netherlands Defence Academy in Breda.

This book, first published in 1961, is an analysis of the great struggle of the twentieth century, the Cold War. It carefully examines the conflict's origins in the Russian Revolution of 1917, and follows the thread of antagonism between west and east all the way up to 1960. These were the key years of the Cold War, when it seemed that the prospect of nuclear confrontation was a real one, and this book offers a close reading of the main events of those years. This volume concentrates on the Cold War in the East, and Volume One focuses on the European theatre.
