Top modern architects from around the world share their most recent designs and discuss the reasoning behind them

'Exquisite Corpse' was a game played by the surrealists in which someone drew on a piece of paper, folded it and passed it to the next person to draw on until, finally, the sheet was opened to reveal a calculated yet random composition. In this entertaining and provocative book, Michael Sorkin suggests that cities are similarly assembled by many players acting with varying autonomy in a complicit framework. An unfolding terrain of invention, the city is also a means of accommodating disparity, of contextualizing sometimes startling juxtapositions. Sorkin's aim is to widen the debate about the creation of buildings beyond the immediate issues of technology and design. He discusses the politics and culture of architecture with daring, often devastating, observations about the institutions and personalities who have dominated the profession over the past decade. Their preoccupation with the empty style of 'beach houses and Disneyland' has consistently trivialized the full constructive scope of contemporary architecture's possibilities. Sorkin's interventions range from the

Access Free Charlottesville Tapes

development scandals of New York where 'skyscrapers stand at the intersection between grid and greed', through the deconstructivist architectural culture of Los Angeles, to the work and ideas of architects, developers and critics such as Alvar Aalto, Norman Foster, Paul Goldberger, Michael Graves, Coop Himmelblau, Philip Johnson, Leon Krier, Frank Lloyd Wright, Richard Rogers, Carlo Scarpa, James Stirling, Donald Trump, Tom Wolfe and Lebbeus Woods. Throughout Sorkin combines stinging polemic with a powerful call for a rebirth of architecture that is visionary and experimental--a recuperated 'dreamy science'

Traces the evolution of American architecture from the late nineteenth century to the present day, arguing that America's unique blend of cultures, sensibilities, and aspirations has shaped architectural development and examining how changes in style, from early skyscrapers, to Art Deco in the 1920s, to today's modernist trends, reflect the social and political issues of their time. Original.

Architect, historian, and educator Robert A.M. Stern presents a personal and candid assessment of contemporary architecture and his fifty years of practice. Encompassing autobiography, institutional history, and lively, behind-the-scenes anecdotes, *Between Memory and Invention* surveys the world of architecture from the 1960s to the present, and Stern's critical role in it. By turns thoughtful, critical, and irreverent, this is a highly accessible text replete with personal insights and humor. The author is Robert A.M. Stern, once described by Philip Johnson as "the

Access Free Charlottesville Tapes

brightest young man I have ever met in my entire teaching career," and internationally acknowledged as a leader in architecture and architectural scholarship. Deeply committed to the concept that architects must "look to the past to build for the future," Stern is the founding partner of Robert A.M. Stern Architects, the former Dean and current Hoppin Professor of Architecture at the Yale School of Architecture, and the author of more than twenty books and countless essays and commentaries on an extraordinary range of architectural and cultural topics. Chronicling his formative years, architectural education, and half-century of architectural practice, Stern touches on influences that shaped him—his Brooklyn upbringing, family excursions to look at buildings, teachers (Paul Rudolph, the legendary Vincent Scully, and Philip Johnson among them), major projects of the firm (the new town of Celebration, Florida, restoration of Times Square and 42nd Street, George W. Bush Presidential Center), and the many clients, fellow architects, and professional partners that have peopled his extraordinary career. Often proposed as "Mr. New York," Stern has a deep commitment to the city, to recording its past—he is the lead author of the monumental New York series, the definitive history of architecture and urbanism from the late nineteenth century to the present—and shaping its future. Today elegant RAMSA residential towers are rising throughout Manhattan to enrich the skyline in the tradition of the luxurious apartment buildings of the 1920s and 1930s. The text is supported by a lively mix of images drawn from Stern's personal archive, including student work and travel slides, images of architectural precedents and colleagues that have shaped his thinking, and images

related to projects he discusses (drawings, plans, and finished photography, architectural team, and clients).

In this comprehensive history, Charles Cotherman traces the stories of notable study centers and networks, as well as their influence on twentieth-century Christianity. Beginning with the innovations of L'Abri and Regent College, Cotherman sheds new light on these defining places in evangelicalism's life of the mind.

In the world of modern art, the idea of appropriation, or the conscious manipulation of the recognised world of another artist, has long been accepted as a legitimate strategy in criticism of the tradition of art authorship, challenging the context of viewing contemporary work and the manipulation of omnipresent media images. The world of art itself is fair game to be pillaged or mined in the production of new art, but there is almost no recognised equivalent aesthetic in architecture. Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career. A singular taste-maker, Philip Johnson influenced art, architecture and design during the second half of the 20th century. Philip Johnson and His Mischief: Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson 's style was influenced first by his mentor, Mies van der Rohe, and then by post-modern ideas and artists. This title serves to review Johnson 's body of work and show that, far from being a weakness, his use of appropriation was a major part of his innovative success.

A vibrant dual portrait that chronicles the lives of and volatile relationship between the two most iconic figures in American architecture: Frank Lloyd Wright and Philip Johnson.

Postmodern architecture - with its return to ornamentality, historical quotation, and low-culture kitsch - has long been seen as a critical and popular anodyne to the worst aspects of modernist architecture: glass boxes built in urban locales as so many interchangeable, generic anti-architectural cubes and slabs. This book extends this debate beyond the modernist/postmodernist rivalry to situate postmodernism as an already superseded concept that has been upended by deconstructionist and virtual architecture as well as the continued turn toward the use of theming in much new public and corporate space. It investigates architecture on the margins of postmodernism -- those places where both architecture and postmodernism begin to break down and to reveal new forms and new relationships. The book examines in detail not only a wide range of architectural phenomena such as theme parks, casinos, specific modernist and postmodernist buildings, but also interrogates architecture in relation to identity, specifically Native American and gay male identities, as they are reflected in new notions of the built environment. In dealing specifically with the intersection between postmodern architecture and virtual and filmic definitions of space, as well as with theming, and gender and racial identities, this book provides provides ground-breaking insights not only into postmodern

Access Free Charlottesville Tapes

architecture, but into spatial thinking in general.
