each chapter is divided into three modules, and in turn, each module is divided into several smaller sections. Consequently, students encounter material in smaller, more manageable chunks that optimize learning.

This detailed and readable book provides readers with a broad overview of the field of human development, covering the entire range of human life—from the moment of conception through death—and focusing on physical, cognitive, and social and personality development. It covers basic theories and research

findings, as well as highlighting current applications outside the laboratory. A nine-part organization covers beginnings, infancy: forming the foundations of life, the preschool years, the middle childhood years, adolescence, early adulthood, middle adulthood, late adulthood, and endings. For individuals spanning the range of human existence—and trying to maximize its current content and inherent promise.

The only first-year experience text with a unifying system for critical thinking and problem solving, P.O.W.E.R. Learning maximizes students'™ potential for success in college and in life. Using the

part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of

racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.
