This question-and-answer companion to The Brigham Intensive Review of Internal Medicine, which is based upon the popular review course from Harvard Medical School, is a study guide for the American Board of Internal Medicine certification or maintenance of certification examination, as well as for general practice review by physicians and residents. Editors Ajay K. Singh and Joseph Loscalzo recruited leading authorities from Harvard as well as former chief residents at Brigham and Women's Hospital to contribute to this book. This thorough resource features 500 board review questions and answers on internal medicine specialties including: Infectious Disease, Hematology and Oncology, Rheumatology, Pulmonary and Critical Care Medicine, Endocrinology, Nephrology and Hypertension, Digestive Diseases and Disorders of the Pancreas and Liver, Cardiovascular Disease, Neurology, and General Internal Medicine. As the required content for the American Board of Internal Medicine continues to evolve, studying can prove challenging. The Brigham Intensive Review of Internal Medicine Question and Answer Companion is the ideal study guide for anyone preparing for certification or recertification.

Based on the popular review course from Harvard Medical School, The Brigham Intensive Review of Internal Medicine Question & Answer Companion, 2nd Edition, provides more than 450 questions and in-depth answers on all specialties of internal medicine, as well as palliative care, occupational medicine, psychiatry, and geriatric medicine. Ideal for preparing for certification or maintenance of certification, this highly regarded review tool positions you for exam success! Contains 450+ board review style questions with full discursive responses – all extensively revised to reflect current board standards. Features a brand new, full-color design with all-new diagrams and color photos. Provides thoroughly revised information throughout, with many new figures and updated tables.

The Elgar Companion to Neo-Schumpeterian Economics is a cutting-edge collection of specially commissioned contributions highlighting not only the broad scope but also the common ground between all branches of this prolific and fast developing field of economics. For 25 years economists have been investigating industrial dynamics under the heading of neo-Schumpeterian economics, which has itself become a mature and widely acknowledged discipline in the fields of innovation, knowledge, growth and development economics. The Elgar Companion to Neo-Schumpeterian Economics surveys the achievements of the most visible scholars in this area. The contributions to the Companion give both a brief survey on the various fields of neo-Schumpeterian economics as well as insights into recent research at the scientific frontiers. The book also illustrates the potential of neo-Schumpeterian economics to overcome its so far self-imposed restriction to the domains of technology driven industry dynamics, and to become a comprehensive approach in economics suited for the analysis of development processes in all economic domains. Integrating both the public sector and financial markets, the book focusses on the co-evolutionary processes between the different domains. As a roadmap for the development of a comprehensive neo-Schumpeterian theory, the Companion will be an invaluable source of reference for researchers in the fields of industrial dynamics and economic growth, and academics and scholars of economics generally. PhD students will find the Companion an indispensable general introduction to the field of neo-Schumpeterian economics. It will also appeal to politicians and consultants engaged in national and international policy as the Companion deals with the highly important and ever topical phenomena of economic development.
