Experience Travel Guides are unique in that they are designed to be read in the same way as a novel. They are a valuable resource for those planning to visit a destination, a source of information for those just interested in finding out more about a country, and a pleasure for those armchair travelers who just enjoy a good read. Experience Myanmar (Burma) highlights the more rewarding parts of the country so that those planning a visit can quickly and efficiently plan an itinerary. We locate and detail the best places to see and the top experiences to enjoy, and recommend accommodation options in all areas. All are based on the personal experience of the author. We capture the personality and the underlying cultural and historical significance of the cities, regions and holiday destinations. Come with us as we explore the wonderful temples and pagodas of Bagan, the unspoiled beaches of the west coast, the historic old northern capital cities, and the pure exhilaration of wonderful Inle Lake. Meet hill-tribe village people, buy fascinating handicrafts, eat tantalizing cuisine, and enjoy charming hospitality. Be aware that many internet sites provide out of date or inaccurate information. We have done everything possible to ensure our information is up to date and we will continue to update the book as necessary. Please realize, however, that no guide book can substitute for common sense. Much of Myanmar is tropical but the northern highlands can get quite cold at night during the main tourist season, so you need to pack clothing, footwear and other items appropriate for those conditions. It is primarily a Buddhist country so you should be aware of the customs and traditions associated with that religion. The country has been isolated from most of the world for several decades so infrastructure and ideas are behind much of the rest of Asia. It is fast catching up, however, and visitor numbers are growing rapidly. Now is a great time to travel there. We believe that every place in the world provides unique experiences which make a visit worthwhile. We encourage you to explore, meet the locals and grab each new opportunity as it arises. Travelling is fun but

always do it with care and compassion. In that way your Myanmar experience can provide lifetime memories.

“Feel better, get done more and become a nicer person” In this age of social media, fake news, individualism and information overload, the certainties we relied on in the past are gone. In our quest for assurance and support, the only seemingly dependable pillar left is other people. So we look to them. But they are unsettled too. And by looking to them, we create and perpetuate our own vicious stress-cycle. As a result, we lose our sensible selves. And we go bananas. But there is good news. If we look around us, there are people who withstand the collective lunacy and stay grounded. They do something that most of us have a hard time doing: they stay themselves. And the best news is that what they can do, you can do too. It doesn't require any special talents or supernatural powers. It only requires doing. In this amiable, open and accessible book, Jeroen Kraaijenbrink takes you on his personal journey out of Bananaland. Drawing from cognitive psychology, martial arts, Saint Benedict, personal experience, and a wide range of other sources, the book offers a nine-step approach with some remarkably practical advice for keeping a cool head in the collective lunacy. “Free yourself from the collective lunacy and reclaim your calm and sensible self”

Hard-copy books, however, are often out of date before they are printed and users are frustrated by experiences contrary to what is described. This book has no such problem as it was thoroughly updated in December 2016 and can be updated as often as necessary to keep it right up to date. Guide to Afro-Cuban Herbalism is aimed to serve as a reference tool for practitioners of the various african based traditions such as Afro-Cuban Orisha/Ifa Worship, Vodou, Camdoble, et al. This book provides extensive information on the medicinal, religious and magical uses of 700 plants.

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

This is a book on one of the most fascinating and controversial areas in contemporary science of carbon, chemistry, and materials science. It concisely summarizes the state of the art in topical and critical reviews written by professionals in this and related fields.
