CO2 Lasers can be used for marking and engraving materials such as plastics, glass, wood, fabrics, ceramics and some metals. Their speed and ease of use means they are now proving to be increasingly beneficial to a variety of industries - particularly as production line speeds increase as well.

CO2 Laser Marking - Laser Lines

The CO2 Laser's marking and engraving capabilities include marking date codes, serial numbers, and other product identification on wood, glass, rubber, plastics, cardboard, and product packaging. For product identification and traceability, the MECCOmark CO2 Laser offers the most cost-effective solution in laser marking and engraving technology.

MECCOmark CO2 Laser Marking Machine | MECCO

At the heart of each laser machine, there is a laser source: the most common are CO₂ and fiber laser markers. CO₂ laser is a gas laser based on a gas mixture of carbon dioxide stimulated electrically with a 10.6 micrometers wavelength. They are particularly suitable for etching organic materials and marking plastics.

This is the most comprehensive guide to laser engraving ever written for the awards and personalization industries. It is ideal for anyone who has recently purchased a laser engraver or is looking to purchase one to start a laser engraving business. Written by a 28 year veteran of laser engraving, shop owner, writer and instructor who currently runs CO2 and Fiber lasers on a daily basis, he has incorporated in this book as much knowledge and experience as possible including tons of color photographs, layouts and product ideas. In a single volume, here is everything you need to know to select, install and run a laser engraver. All major brands are included as well as glass tube lasers, metal tube CO2 lasers and fiber lasers. Also included is a complete discussion of the various materials that can be lasered, their sources, advantages and limitations. A list of wholesale suppliers and educational sources are also included. FREE with purchase is online access to his original LASER ENGRAVING DVD (a \$59.95 value), CorelDraw instructional videos and more! The author writes monthly articles about laser engraving and related topics for the trade magazine, the Engravers Journal. This book includes recommendations for buying a laser engraver including the features and options available, so you can make the right buying decision. If you already have a laser engraver, there are hundreds of ideas for expanding your engraving business including resources available. Whether you plan to start a home-based business, a storefront or just engrave for fun, this is intended to be your most valuable resource. Because it contains information about all the various materials you can laser engraver and how to do it, what to avoid and shortcuts to make it easier, you will want to keep the 240+ jam-packed pages of information and ideas next to your engraver. Materials included in the manual include wood, acrylic, plastics, leather, metal, films, Rhinestoning, fabric, and many more. This manual includes various projects to help the beginner learn about their laser and how to use the settings, options and features to make money. It also provides basic information about setting up a shop, either in a home or storefront, including the types of chemicals and other products that might be needed to perform all the various applications of laser engraving. Included are notations that apply to either CO2, Fiber Lasers or Glass Tube Lasers along with the advantages and disadvantages of each. Also included is a discussion of gantry vs. Galvo style lasers and the advantages of each.

CO2 Laser Cutting explains and describes how engineering materials are cut using a CO2 laser. Information is given on the cutting of metals and non metals on a wide range of levels from practical advice and processing parameters to explanations of the physical and chemical reactions which take place in the cut zone. In an effort to make the book as readable and informative as possible the subject is treated in a descriptive rather than a mathematical way. The benefit of CO2 Laser Cutting is twofold as it gives practical advice to the operator and technical advice to the researchers or scientist.

Part of an eight volume series each focusing on a subspecialty: Cataract Surgery, Refractive Surgery, Oculoplasty and Reconstructive Surgery, Corneal Surgery, Glaucoma Surgery, Retinal Surgery, Strabismus Surgery, Paediatric Ophthalmic Surgery. This book covers all types of oculoplasty and reconstructive surgical techniques in a step by step, easy to follow format. It serves as a ready reference of ophthalmic surgeries demonstrated by international experts and includes comprehensive tips on the efficient use of various surgical techniques.

Vols. for 1970-71 includes manufacturers' catalogs.

Laser Cutting Guide for Manufacturing presents practical information and troubleshooting and design tools from a quality manufacturing perspective. Equally applicable to small shops as it is to large fabricator companies, this guide is a roadmap for developing, implementing, operating, and

maintaining a laser-cutting manufacturing enterprise. The book focuses on metal cutting of sheets, plates, tubes, and 3-D shaped stampings. It presents today's reality of the engineering and business challenges, and opportunities presented by the rapid penetration cutting in all facets of industry.

Manufacturing with lasers is becoming increasingly important in modern industry. This is a unique, most comprehensive handbook of laser applications to all modern branches of industry. It includes, along with the theoretical background, updates of the most recent research results, practical issues and even the most complete company and product directory and supplier's list of industrial laser and system manufacturers. Such important applications of lasers in manufacturing as welding, cutting, drilling, heat treating, surface treatment, marking, engraving, etc. are addressed in detail, from the practical point of view. A list of specific companies dealing with manufacturing aspects with lasers is given.
