This popular text provides an in-depth introduction to debates within post-colonial theory and criticism. The readings are drawn from a diverse selection of thinkers both historical and contemporary.

This book on post-colonial theory has a wide geographic range and a breadth of historical perspectives. Central to the book is a critique of the very idea of the 'postcolonial' itself.

Colonialism/Postcolonialism is a comprehensive yet accessible guide to the historical and theoretical dimensions of colonial and postcolonial studies. Ania Loomba deftly introduces and examines: key

features of the ideologies and history of colonialism the relationship of colonial discourse to literature challenges to colonialism, including anticolonial discourses recent developments in postcolonial theories and histories issues of sexuality and colonialism, and the intersection of feminist and postcolonial thought debates about globalization and postcolonialism Recommended on courses across the academic disciplines and around the world, Colonialism/Postcolonialism has for some years been accepted as the essential introduction to a vibrant and politically charged area of literary and cultural study. With new coverage of emerging debates around globalization, this second edition will continue to serve as the ideal guide for students new to colonial discourse theory, postcolonial studies or postcolonial theory as well as a reference for advanced students and teachers.

The first book of its kind in the field, this timely introduction to post-colonial theory offers lucid and accessible summaries of the major work of key theorists such as Frantz Fanon, Edward Said, Homi Bhabha and Gayatri Spivak. The Guide also Explores the lines of resistance against colonialism and highlights the theories of post-colonial identity that have been responsible for generating some of the most influential and challenging critical work of recent decades. Designed for undergraduates and postgraduates taking courses related to colonialism or post-colonialism, the book summarises the major topics and issues as well as covering the contributions of major and less familiar figures in the field.

Postcolonialism offers challenging and provocative ways of thinking about colonial and neocolonial power, about self and other, and about the discourses that perpetuate postcolonial inequality and violence. Much of the seminal work in postcolonialism has been shaped by currents in philosophy, notably Marxism and ethics. "Understanding Postcolonialism" examines the philosophy of postcolonialism in order to reveal the often conflicting systems of thought which underpin it. In so doing, the book presents a reappraisal of the major postcolonial thinkers of the twentieth century. Ranging beyond the narrow selection of theorists to which the field is often restricted, the book explores the work of Fanon and Sartre, Gandhi, Nandy, and the Subaltern Studies Group, Foucault and Said, Derrida and Bhabha, Khatibi and Glissant, and Spivak, Mbembe and Mudimbe. A clear and accessible introduction to the subject, "Understanding Postcolonialism" reveals how, almost half a century after decolonisation, the complex relation between politics and ethics continues to shape postcolonial thought.

Offers a lucid introduction to postcolonial studies, one of the most important strands in recent literary theory and cultural studies.

An essential guide to understanding the issues which characterize post-colonialism. A comprehensive glossary has extensive cross-referencing, a bibliography of essential writings and an easy-to-use A-Z format.

The Post-Colonial Studies Reader is the most comprehensive selection of key texts in post-colonial theory and criticism yet compiled. This collection covers a huge range of topics, featuring nearly ninety of the discipline's most widely read works. The Reader's 90 extracts are designed to introduce the major issues and debates in the field of post-colonial literary studies. This field itself, however, has become so varied that no collection of readings could encompass every voice which is now giving itself the name "post-colonial." The editors, in order to avoid a volume which is simply a critical canon, have selected works representing arguments with which they do not necessarily agree, but rather which above all stimulate discussion, thought and further exploration. Post-colonial "theory" has occurred in all societies into which the imperial force of Europe has intruded, though not always in the official form of theoretical text. Like the description of any other field the term has come to mean many things, but this volume hinges on one incontestable phenomenon: the "historical fact" of colonialism, and the palpable consequences to which this phenomenon gave rise. The topic involves talk about experience of various

kinds: migration, slavery, suppression, resistance, representation, difference, race, gender, place, and reaction to the European influence, and about the fundamental experiences of speaking and writing by which all these come into being. In compiling this reader, the editors have sought to stimulate people to ask: "How might a genuinely post-colonial literary enterprise proceed?" The fourteen sections include: Issues and Debates; Universality and Difference; Textual Representation and Resistance; Postmodernism and Post-Colonialism; Nationalism; Hybridity; Ethnicity and Indigeneity; Feminism and Post-Colonialism; Language; The Body and Performance; History; Place; Education; and Production and Consumption. Contributors include many of the leading post-colonial theorists and critics--such as Franz Fanon, Chinua Achebe, Gayatri Chakravorty Spivak, Ngũgĩ wa Thiong'o, Homi Bhabha, Derek Walcott, Edward Said, and Trinh T. Minh-ha--in addition to a number of the discourse's newer voices. The Post-Colonial Studies Reader will prove an authoritative compilation, representing an invaluable contribution to the study of post-colonial theory and criticism.

Published twenty years ago, Leela Gandhi's *Postcolonial Theory* was a landmark description of the field of postcolonial studies in theoretical terms that set its intellectual context alongside poststructuralism, postmodernism, Marxism, and feminism. Gandhi examined the contributions of major thinkers such as Edward Said, Gayatri Spivak, Homi Bhabha, and the subaltern historians. The book pointed to postcolonialism's relationship with earlier anticolonial thinkers such as Frantz Fanon, Albert Memmi, Ngũgĩ wa Thiong'o, and M. K. Gandhi and explained pertinent concepts and schools of thought—hybridity, Orientalism, humanism, Marxist dialectics, diaspora, nationalism, gendered subalternity, globalization, and postcolonial feminism. The revised edition of this classic work reaffirms its status as a useful starting point for readers new to the field and as a provocative account that opens up possibilities for debate. It includes substantial additions: A new preface and epilogue reposition postcolonial studies within evolving intellectual contexts and take stock of important critical developments. Gandhi examines recent alliances with critical race theory and Africanist postcolonialism, considers challenges from postsecular and postcritical perspectives, and takes into account the ontological, environmental, affective, and ethical turns in the changed landscape of critical theory. She describes what is enduring in postcolonial thinking—as a critical perspective within the academy and as an attitude to the world that extends beyond the discipline of postcolonial studies.
