A book for young readers about Christopher Columbus.

Presents an easy-to-read biography of the sailor who never fully recognized the importance of his discovery which changed history.

Two professors and a preacher invented Columbus radio. It began with science experiments in classrooms and a minister's desire to expand beyond his churchgoing audience. By 1922, government licenses had been issued for WEAO at Ohio State University and WJD at Denison University. At this same time, a Baptist minister went on the air for an hour each Sunday morning using a 10-watt transmitter licensed as WMAN. In this story of Columbus radio, the work of the professors and the preacher will evolve into radio with advertiser-supported programs of information and entertainment. Three important radio stations will serve a growing Columbus radio audience in different ways: WEAO becomes WOSU, a national pioneer in using radio for teaching; WMAN becomes WCOL and in the 1960s is number one in audience size; and CBS affiliate WBNS becomes the class act of Columbus radio, retaining the major share of local listeners for many decades. Including many other stations of lesser influence, the illustrated stories of Columbus radio are told in this book.

This definitive edition of Columbus's account of the voyage presents the most accurate printed version of his journal available to date. Unfortunately both Columbus's original manuscript, presented to Ferdinand and Isabella along with other evidence of his discoveries, and a single complete copy have been lost for centuries. The primary surviving record of the voyage-part quotation, part summary of the complete copy-is a transcription made by Bartolome de las Casas in the 1530s. This new edition of the Las Casas manuscript presents its entire contents-including notes, insertions, and canceled text-more accurately, completely, and graphically than any other Spanish text published so far. In addition, the new translation, which strives for readability and accuracy, appears on pages facing the Spanish, encouraging on-the-spot comparisons of the translation with the original. Study of the work is further facilitated by extensive notes, documenting differences between the editors' transcription and translation and those of other transcribers and translators and summarizing current research and debates on unanswered current research and debates on unanswered questions concerning the voyage. In addition to being the only edition in which Spanish and English are presented side by side, this edition includes the only concordance ever prepared for the Diario. Awaited by scholars, this new edition will help reduce the guesswork that has long plagued the study of Columbus's voyage. It may shed light on a number of issues related to Columbus's navigational methods and the identity of his landing places, issues whose resolution depend, at least in part, on an accurate transcription of the Diario. Containing day-by-day accounts of the voyage and the first sighting of land, of the first encounters with the native populations and the first appraisals of his islands explored, and of a suspenseful return voyage to Spain, the Diario provides a fascinating and useful account to historians, geographers, anthropologists, sailors, students, and anyone else interested in the discovery-or in a very good sea story. Oliver Dunn received the PH.D. degree from Cornell University. He is Professor Emeritus in Purdue University and a longtime student of Spanish and early history of Spanish America. James E. Kelley, Jr., received the M.A. degree from American University. A mathematician and computer and management consultant by vocation, for the past twenty years he has studied the history of European cartography and navigation in late-medieval times. Both are members of the Society for the History of Discoveries and have written extensively on the history of navigation and on Columbus's first voyage. Although they remain unconvinced of its conclusions, both were consultants to the National Geographic Society's 1986 effort to establish Samana Cay as the site of Columbus's first landing.

While all kids know something about Christopher Columbus, few know the full story of this amazing, resourceful, and tragic man of history. Christopher Columbus and the Age of Exploration for Kids takes a comprehensive, nuanced, and inclusive approach to Columbus, placing him in the context of the explorations that came before, during, and after his lifetime and portraying the "Admiral of the Ocean Seas" neither as hero nor heel but as a flawed and complex man whose significance is undeniably monumental. Providing kids, parents, and teachers with a fuller picture of the seafaring life and the dangers and thrills of exploration, the book details all four of Columbus's voyages to the New World, not just his first, and describes the year that Columbus spent stranded on the island of Jamaica without hope of rescue. A full chapter is devoted to painting a more complex portrait of the indigenous peoples of the New World and another to the consequences of Columbus's voyages-the exchange of diseases, ideas, crops, and populations between the New World and the Old. Engaging crosscurricular activities such as taking nautical measurements, simulating a hurricane, making an ancient globe, and conducting silent trade elucidate both nautical concepts introduced and the times in which Columbus lived. Ronald Reis is the technology department chair at Los Angeles Valley College and the award-winning author of sixteen nonfiction books for young adults on subjects as varied as African Americans and the Civil War and Simón Bolívar.

A simple account of Christopher Columbus' first voyage to America.

Relates how Columbus lobbied in three countries for financial support for his journey to find a route to Asia and changed the course of history when he encountered the New World

Christopher Columbus authored over a hundred different documents giving testimony on the Discovery to Isabella and Ferdinand. These texts are examined for authenticity and authority, and Columbus's views on the Indians. America is viewed through European eyes that helped represent and shape the Discovery.
