Combat Tactics allows for more conditional tactics to be used during combat. Using the Tactics system, these scripts allow the character to perform certain actions provided that the conditions are met. For example, when a character falls below 50% health, the character will drink a potion. This skill is most helpful for players who wish for their party to function without tactical intervention during combat.

Intruder Combat Training - Play on Armor Games
Military tactics encompasses the art of organizing and employing fighting forces on or near the battlefield. They involve the application of four battlefield functions which are closely related – kinetic or firepower, mobility, protection or security, and shock action. Tactics are a separate function from command and control and logistics. In contemporary military science, tactics are the lowest of three levels of warfighting, the higher levels being the strategic and operational levels ...

Military tactics - Wikipedia
The COMBAT MEDIC COURSE is a special operations field medical training that combines military special operation forces combat casualty care and police special units (SWAT) tactical medical knowledge and skills into a two day training course.

For decades, military historians have argued that the introduction of the rifle musket-with a range five times longer than that of the smoothbore musket-made the shoulder-to-shoulder formations of linear tactics obsolete. Author Earl J. Hess challenges this deeply entrenched assumption. He contends that long-range rifle fire did not dominate Civil War battlefields or dramatically alter the course of the conflict because soldiers had neither the training nor the desire to take advantage of the musket rifle's increased range. Drawing on the drill manuals available to officers and a close reading of battle reports, Civil War Infantry Tactics demonstrates that linear tactics provided the best formations and maneuvers to use with the single-shot musket, whether rifle or smoothbore. The linear system was far from an outdated relic that led to higher casualties and prolonged the war. Indeed, regimental officers on both sides of the conflict found the formations and maneuvers in use since the era of the French Revolution to be indispensable to the survival of their units on the battlefield. The training soldiers received in this system, combined with their extensive experience in combat, allowed small units a high level of articulation and effectiveness. Unlike much military history that focuses on grand strategies, Hess zeroes in on formations and maneuvers (or primary tactics), describing their purpose and usefulness in regimental case studies, and pinpointing which of them were favorites of unit commanders in the field. The Civil War was the last conflict in North America to see widespread use of the linear tactical system, and Hess convincingly argues that the war also saw the most effective tactical performance yet in America's short history.

Xingyiquan training manual featuring general descriptions of Xingyiquan branches, tactical details of the standard 5 Elements and 10 Animal forms, Standing Post practice, the 36 classical combat tactics, Yin & Yang structure, Pole rolling exercises to enhance push hands structure and much more.

In Leadership and Training for the Fight, MSG Paul R. Howe, U.S. Army Retired, shares ideas on leadership that he has developed through extensive combat experience. Howe tells riveting stories of military operations and analyzes leadership concepts. He also gives advice on how to understand students and how to refine your teaching methods. Written with the unique insight of a Special Operations soldier, this book is the perfect guide for anyone interested in improving leader- ship skills in civilian or military situations.

A pilot field test in 1974 demonstrated the effectiveness of using an Army tactical data system for computer-assisted instruction (CAI) of soldiers when the system was not being used for tactical operations. Courseware was written in the existing author language PLANIT to run on the Army's Developmental Tactical Operations System (DEVTOS). Lessons were developed in two proficiency test areas, Crew Served Weapons and Tactics, and the 120 participating noncommissioned officers (NCOs) were chosen for their previous low scores in these subjects. After a pretest, half the group studied with CAI, a fourth studied from Army manuals, and a fourth served as a control group by studying unrelated material. A posttest measured learning, and interviews with the CAI group recorded their enthusiastic comments. The CAI group learned significantly more than the others did. The automated instruction also worked equally well for fast and slow learners and across differences in age, education, and paygrade. Slow learners seemed to use the same strategy as fast learners but to take more time. The results, therefore, demonstrated the feasibility and benefits of the project.

In this book, world-class self-defense and tactical trainer Andy Stanford covers a wide spectrum of high- and low-tech approaches to prevailing in any high-risk, reduced-light scenario. Stanford cuts through the myths and misconceptions about night-fighting hardware and shows you how to employ it effectively in low-light combat.

 Hundreds of photos--many of them rare--of Tiger tanks and their crews Color illustrations by Jean Restayn focus on markings, camouflage, and insignia Inventories and timelines for each unit In this follow-up to Tigers in Combat I (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's "named" units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

Teaching / Learning combat tactics made simpleStruggling to find a straight forward approach to training??? This book simplifies the training of all fencing (weapon) arts, tackling both the: Contents (What to teach) Pedagogy (How to teach) Understanding counter attack selection is made simple through concepts, games & drills Straight forward explainations on how to choose one's counter according to: Number of opponents Traits of weapons: a) Bladed /blunt b) With and without hand guard c) Single or double handed Having greater, lesser or the same reach Type of parry performed Quality of footwork Related videos: https://www.youtube.com/watch?v=0Xkgok_Md24&list=PL3bXFhDWjA5uzmNKsTLzSGEUcnNLc5xY4 You'll only need to focus on training ... and enjoy your improved combat understanding & decision making
