This book introduces leadership and organizational scholars to the potential of complexity science for broadening leadership study beyond its traditional focus on leaders' actions and influence, to a consideration of leadership as a broader, dynamically and interactive organizing process. The book offers a primer on complexity science and its applications to organization studies, and compares the logics of complexity science with those underlying traditional leadership approaches. It describes methodological approaches for studying leadership from a complexity perspective, and offers examples of applications of complexity science to leadership theory. Chapters are written by top scholars in complexity and leadership theory.

This book develops a new paradigm in the field of leadership studies, referred to as the "leadership-as-practice" (L-A-P) movement. Its essence is its conception of leadership as occurring as a practice rather than residing in the traits or behaviours of particular individuals. A practice is a coordinative effort among participants who choose through their own rules to achieve a distinctive outcome. It also tends to encompass routines as well as problem-solving or coping skills, often tacit, that are shared by a community. Accordingly, leadership-as-practice is less about what one person thinks or does and more about what people may accomplish together. It is thus concerned with how leadership emerges and unfolds through day-to-day experience. The social and material contingencies impacting the leadership constellation – the people who are effecting leadership at any given time – do not reside outside of leadership but are very much embedded within it. To find leadership, then, we must look to the practice within which it is occurring. The leadership-as-practice approach resonates with a number of closely related traditions, such as collective, shared, distributed, and relational leadership, that converge on leadership processes. These approaches share a line of inquiry that acknowledges leadership as a social phenomenon. The new focus opens up a plethora of research opportunities encouraging the study of social processes beyond influence, such as intersubjective agency, shared sense-making, dialogue, and co-construction of responsibilities.

Using leadership to generate greater innovation, connectivity, and organizational transformation is crucial for success in this challenging era. The authors present here a new approach to leadership based on findings from complexity science. Integrating real case studies with rigorous research results, they explore the biggest challenges being faced in fast-paced organizations, and provide a host of concrete tools for leading during critical periods, catalyzing novelty, expanding networks, and generating transformative change throughout an organization.

Now in its second edition, this highly acclaimed text remains the only cohesive, comprehensive textbook and professional reference for CNS education and practice. Supported by theory, research, and current literature, the text focuses on CNS roles and scope of practice, expanding opportunities in primary and home

care settings, and on outcomes of CNS practice across the care continuum. This second edition reflects two emerging trends affecting CNS practice: an increased focus on transitional care (continuity across the care setting continuum) and new Centers for Medicare Services reimbursement rules related to pressure ulcers, fall and infection prevention, and pain management. Additionally, the second edition places increased emphasis on CNS practice outcomes and newly emerging roles in chronic illness management in primary and home care settings.

Volume 33 of *Advances in Library Administration and Organization* brings together a range of diverse and reflective essays to provide strategies that will be of value in addressing challenges faced by current and future library managers.

“This book claims to be ‘like no other’ and that is so true. The editors and authors each add quality guidance around distributed leadership to readers, providing evidence-based examples, useful websites and key reading material to support and supplement the ideas being presented.” Bridie Kent, Professor in Leadership in Nursing, University of Plymouth, UK “This book, thankfully, isn’t about self-defined heroic organizational leaders or power-hungry political leaders – it tells the stories of the people doing leadership every day in their work to make healthcare happen.” Scott Taylor, Business School Director of Admissions, University of Birmingham, UK This innovative book brings together experts from health sciences, nursing, business and management backgrounds to provide a broad analysis of the growing field of distributed leadership. The book offers health professionals practical guidance on applying distributed leadership, resulting in more effective forms of collaborative clinical teamwork and lasting improvements in care. The text: •Offers a comprehensive collection of perspectives, featuring chapters by expert clinical, nursing and management studies contributors •Synthesizes and explores recent developments in the leadership and distributed leadership research literature •Supports research and theory with examples of cases of effective distributed leadership in clinical practice, service quality, patient safety, leadership development, general nursing, midwifery education, oncology services, intellectual disability, evidence-based practice and organizational change and development •Provides an international focus, to encourage reflection on learning from experiences across Europe and beyond Distributed Leadership in Nursing and Healthcare is essential reading for health professionals, undergraduate and postgraduate students, and researchers working in the field of leadership. Edited by: Elizabeth A. Curtis, Assistant Professor, Trinity College Dublin, Ireland Martin Beirne, Emeritus Professor of Management and Organisational Behaviour at the University of Glasgow, UK John G. Cullen, Associate Professor, Maynooth University, Ireland Ruth Northway, Professor of Learning Disability Nursing, University of South Wales, UK Siobhán M. Corrigan, Assistant Professor, Trinity College Dublin, Ireland

Prepare for licensure and your transition to practice! Organized around the issues in today’s constantly changing healthcare environment Yoder-Wise’s *Leading & Managing in Canadian Nursing*, 2nd Edition offers an innovative approach to leading and managing by merging theory, research, and practical application. This cutting-edge text is intuitively organized around the issues that are central to the success of Canadian nurses including cultural diversity, resource management, advocacy, patient safety, delegation, and communication. In addition, it provides just the right amount of information to equip you with the tools you need to master leadership and management – all to help prepare you for clinical practice! UNIQUE! Each chapter opens with A Challenge, where practicing nurse leaders/managers offer their real-world views of a concern related in the chapter, encouraging you to think about how you would handle the situation. UNIQUE! A Solution closes each chapter with an effective method to handle the real-life situation presented in A Challenge and demonstrates the ins and outs of problem-solving in practice. Innovative content and presentation, merge theory, research and professional practice in key leadership and management areas. An array of pedagogical elements includes chapter objectives, glossary terms, exercises, Research Perspectives, Literature Perspectives, Theory Boxes, chapter checklists, tips, and references. Intuitively organized content and clear and unbiased writing style facilitates learning of theory and complex concepts. Inviting and well-structured full-colour design enhances your learning by being able to find information quickly and easily, providing visual reinforcement of concepts. UNIQUE! Two NEW chapters help build your leadership skills within your academic program – one of which is authored by an undergraduate student and an early career alumnus. NEW! UNIQUE! Chapter on nursing leadership in Indigenous health explains the leadership role and is also integrated into relevant topics throughout the text. NEW! Expanded and updated coverage of topics includes workplace violence and incivility, strength-based nursing and the role of nurses as change agents – visioning, shaping culture, leading change. NEW! Expanded discussion on the interdependence of leadership and management roles and competencies clearly fosters leadership ideas for effective and responsive health care environments. NEW! Additional examples of real life practice cases and examples help you to examine and apply theoretical concepts.

One global leadership challenge is managing the complexity of the political and economic climate of a society. As the global environment changes, it is essential for global leaders to adapt and develop flexible strategies for resolving conflicts and achieving peace. *Global Leadership Initiatives for Conflict Resolution and Peacebuilding* provides emerging research on a leader’s role in the international, national, and nongovernmental organization within post-conflict resolution and peaceful leadership. While highlighting topics, such as civil society organizations, leadership education, and social reconstruction, this book explores leadership theories and practice models to conceptualize the intersection of leadership within conflict management and resolution. This book is an important resource for leaders, scholar-practitioners, educators, and researchers seeking current research on the strategic and diplomatic methods of a peaceful global organization.

Hospitality is an industry characterised by its complex nature and numerous sectors including hotels, hostels, B&Bs, restaurants, pubs, nightclubs and contract catering. However, despite its segmentation, there are key issues that are pertinent to all subsectors. The *Routledge Handbook of Hospitality Management* adopts a strategic approach and explores and critically evaluates current debates, issues and controversies to enable the reader to learn from the industry’s past mistakes as well as future opportunities. Especially relevant at a time when many sectors of the industry have to re – evaluate and reinvent themselves in response to the economic downturn the Handbook brings together specialists from both industry and academia and from a range of geographical regions to provide state-of-the-art theoretical reflection and empirical research. Each of the five inter related sections explores and evaluates issues that are of extreme importance to hospitality organisations, many of which have not been adequately explored before: external and internal customers, debates surrounding finance, uncertainty risk and conflict, sustainability, and e-Hospitality and Technology. This book is an invaluable resource for all those with an interest in hospitality, encouraging dialogue across disciplinary boundaries and areas of study. It is essential reading for students, researchers & academics and managers of Hospitality as well as those of Tourism, Events, Marketing, and Business Management.

Develop your management and nursing leadership skills! *Leadership & Nursing Care Management*, 7th Edition focuses on best practices to help you learn to effectively manage interdisciplinary teams, client needs, and systems of care. A research-based approach includes realistic cases studies showing how to apply management principles to nursing practice. Arranged by American Organization for Nursing Leadership (AONL) competencies, the text addresses topics such as staffing and scheduling, budgeting, team building, legal and ethical issues, and measurement of outcomes. Written by noted nursing educators Diane L. Huber and Maria Lindell Joseph, this edition includes new Next Generation NCLEX® content to prepare you for success on the NGN certification exam. UNIQUE! Organization of chapters by AONL competencies addresses leadership and care management topics by the five competencies integral to nurse executive roles. Evidence-based approach keeps you on the cutting edge of the nursing profession with respect to best practices. Critical thinking exercises at the end of each chapter challenge you to reflect on chapter content, critically analyze the information, and apply it to a situation. Case studies at the end of each chapter present real-world leadership and management vignettes and illustrate how concepts can be applied to specific situations. Research Notes in each chapter summarize current research studies relating to nursing leadership and management. Full-color photos and figures depict concepts and enhance learning. NEW! Updates are included for information relating to the competencies of leadership, professionalism, communication and relationship building, knowledge of the healthcare environment, and business skills. NEW! Five NGN-specific case studies are included in this edition to align with clinical judgment content, preparing you for the Next Generation NCLEX® (NGN) examination. NEW contributors – leading experts in the field – update the book’s content.
