About The New Confessions of an Economic Hit Man. Featuring 15 explosive new chapters, this new edition of the New York Times bestseller brings the story of Economic Hit Men up-to-date and, chillingly, home to the U.S.—but it also gives us hope and the tools to fight back.

Confessions of an Economic Hitman - John Perkins

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

Shocking Bestseller: The original version of this astonishing tell-all book spent 73 weeks on the New York Times bestseller list, has sold more than 1.25 million copies, and has been translated into 32 languages. New Revelations: Featuring 15 explosive new chapters, this expanded edition of Perkins's classic bestseller brings the story of economic hit men (EHMs) up to date and, chillingly, home to the US. Over 40 percent of the book is new, including chapters identifying today's EHMs and a detailed chronology extensively documenting EHM activity since the first edition was published in 2004. Former economic hit man John Perkins shares new details about the ways he and others cheated countries around the globe out of trillions of dollars. Then he reveals how the deadly EHM cancer he helped create has spread far more widely and deeply than ever in the US and everywhere else—to become the dominant system of business, government, and society today. Finally, he gives an insider view of what we each can do to change it. Economic hit men are the shock troops of what Perkins calls the corporatocracy, a vast network of corporations, banks, colluding governments, and the rich and powerful people tied to them. If the EHMs can't maintain the corrupt status quo through nonviolent coercion, the jackal assassins swoop in. The heart of this book is a completely new section, over 100 pages long, that exposes the fact that all the EHM and jackal tools—false economics, false promises, threats, bribes, extortion, debt, deception, coups, assassinations, unbried military power—are used around the world today exponentially more than during the era Perkins exposed over a decade ago. The material in this new section ranges from the Seychelles, Honduras, Ecuador, and Libya to Turkey, Western Europe, Vietnam, China, and, in perhaps the most unexpected and sinister development, the United States, where the new EHMs—bankers, lobbyists, corporate executives, and others—"con governments and the public into submitting to policies that make the rich richer and the poor poorer." But as dark as the story gets, this reformed EHM also provides hope. Perkins offers a detailed list of specific actions each of us can take to transform what he calls a failing Death Economy into a Life Economy that provides sustainable abundance for all.

A former consultant to the U.S. government reveals the inner workings of the high-stakes economic game that encourages third world economies to borrow money so that major corporations like Halliburton end up getting the lucrative contracts.

Presents an expose of international corruption activities as reported by some of the world's top assassins, journalists, and activists, in a cautionary report that makes recommendations for safeguarding the world.

"This eloquent book inspires us to create a new reality of what it means to be human on this magnificent planet." —Deepak Chopra When New York Times bestselling author John Perkins was a young Peace Corps volunteer, his life was saved by an Amazonian shaman who taught him to "touch the jaguar"—to transform his fears into positive action. He went on to become an "economic hit man" (EHM), convincing developing countries to build huge infrastructure projects that put them perpetually in debt to the World Bank and other US-controlled institutions. Although he sincerely believed this was the best model for economic development, he came to realize it was really a new form of colonialism. Returning to the Amazon, he saw the destructive impact of his EHM work. But he also was inspired by a previously uncontacted tribe that touched its jaguar by uniting with its enemies to defend its territory against invading oil and mining companies. For the first time, Perkins details how his experiences in the Amazon converted him from an EHM to a crusader for transforming our failing Death Economy that destroys its own resources and nature itself into a flourishing Life Economy that renews itself. He provides a strategy for each of us to change our lives and defend our territory—the earth—against destructive policies and systems.

After 'Hit Man' The New York Times bestseller Confessions of an Economic Hit Man documents John Perkins' extraordinary career as a globe-trotting economic hit man. Perkins' insider's view leads him to crisis of conscience—to the realization that he must devote himself to work which will foster a world-wide awareness of the sanctity of indigenous peoples, their cultures, and their environments. Perkins' books demonstrate how the age-old shamanic techniques of some of the world's most primitive peoples have sparked a revolution in modern concepts about healing, the subconscious, and the powers each of us has to alter individual and communal reality. This groundbreaking book is John Perkins' firsthand account of his experiences with the shamanic technique of psychonavigation—a method of traveling outside the body by means of visions and dream wanderings—and his encounters with the Shuar of the Amazon, the Quechua of the Andes, and the Bugis of Indonesia. Shuar shamans psychonavigate for the purposes of hunting and healing, while the Bugis, among the most renowned sailors of the world, use these techniques to navigate without the aid of charts and compasses. Perkins explains how these techniques work and how the people of these indigenous cultures psychonavigate to both distant physical destinations and sources of inner wisdom. Throughout history, psychonavigation has been practiced by highly creative minds such as Beethoven, Jung, and Einstein. Perkins' riveting narrative takes us on a journey of personal discovery as he learns the great value of these techniques and their relevance not only to individual well-being, but to the health of the environment and of the world at large. He reveals how by attuning to the positive forces in nature and communicating with our inner guides we all can become psychonavigators, finding our way to wise decisions and developing innovative approaches to the challenges we face as individuals and a world community.

After 'Hit Man' The New York Times bestseller Confessions of an Economic Hit Man documents John Perkins' extraordinary career as a globe-trotting economic hit man. Perkins' insider's view leads him to crisis of conscience—to the realization that he must devote himself to work which will foster a world-wide awareness of the sanctity of indigenous peoples, their cultures, and their environments. Perkins' books demonstrate how the age-old shamanic techniques of some of the world's most primitive peoples have sparked a revolution in modern concepts about healing, the subconscious, and the powers each of us has to alter individual and communal reality. Deep in the rain forests and high in the Andes of Ecuador, native shamans teach the age-old technique of dream change, a tradition that has kept the cultures of the Otavalans, Salasacans, and Shuar alive despite centuries of conquest. Now these shamans are turning their wisdom and power to the problem of curing a new kind of illness—that created by the industrial world's dream of dominating and exploiting nature. John Perkins tells the story of these remarkable shamans and of the U.S. medical doctors, psychologists, and scientists who have gone with him to learn the techniques of dream change. These shamanic teachings have sparked a revolution in modern concepts about healing, the subconscious, and the powers each of us has to alter individual and communal reality.

Newsbreaking and controversial -- an award-winning investigative journalist uncovers the thirty-year relationship between the Bush family and the House of Saud and explains its impact on American foreign policy, business, and national security House of Bush. House of Saud begins with a politically explosive question: How is it that two days after 9/11, when U.S. air traffic was tightly restricted, 140 Saudis, many immediate kin to Osama Bin Laden, were permitted to leave the country without being questioned by U.S. intelligence? The answer lies in a hidden relationship that began in the 1970s, when the oil-rich House of Saud began courting American politicians in a bid for military protection, influence, and investment opportunity. With the Bush family, the Saudis hit a gusher -- direct access to presidents Reagan, George H.W. Bush, and George W. Bush. To trace the amazing weave of Saudi-Bush connections, Unger interviewed three former directors of the CIA, top Saudi and Israeli intelligence officials, and more than one hundred other sources. His access to major players is unparalleled and often exclusive -- including executives at the Carlyle Group, the giant investment firm where the House of Bush and the House of Saud each has a major stake. Like Bob Woodward's The Veil, Unger's House of Bush, House of Saud features unprecedented reportage. Like Michael Moore's Dude, Where's My Country? Unger's book offers a political counter-narrative to official explanations; this deeply sourced account has already been cited by Senators Hillary Rodham Clinton and Charles Schumer, and sets 9/11, the two Gulf Wars, and the ongoing Middle East crisis in a new context: What really happened when America's most powerful political family became seduced by its Saudi counterparts?

Takes aim at the current global economic crisis and attempts to clear a path out of the rubble by providing a plan for remaking the economic markets.

A distinguished economist and futurist examines the terrible impact of the current global economic system on international communities and the planet, and calls for a spread of international democracy and the need to forge new global agreements to form community-based societies. \$40,000 ad/promo.
