Encompasses topics including aging (geropsychology), assessment, clinical, cognitive, community, counseling, educational, environmental, family, industrial/organizational, health, school, sports, and transportation psychology. Each entry provides a clear definition, a brief review of the theoretical basis, and emphasizes major areas of application.

This book is the first to examine the social and political construction of anti-poverty programs in Central and Eastern Europe, which has faced serious hardships as it has transitioned from communist rule to capitalism beset by economic crisis. It explores a range of different attitudes held about poverty-stricken people and illustrates how the distinction between deserving and undeserving poor has evolved over the years, effected by external pressures from groups like the European Union and World Bank. By examining poverty policies against the commonly held attitudes about the poor that have influenced them, Serena Romano offers a new understanding of the many ways that different post-communist welfare states have dealt with—and understood—citizens facing economic hardship.

An excellent resource for social studies teachers, this book will help them learn about and reflect on their responsibilities in our society. It focuses on classroom-based experiences and real-world contexts. The teaching methods discussed are also closely associated to social studies subject matter so they can be integrated into the actual classroom. Each chapter also examines how social studies is situated within the larger elementary curriculum to demonstrate the interdisciplinary nature of the instruction.

This volume has long been an invaluable resource for students and practitioners of social work. It thoroughly and clearly presents research concepts and skills, uniquely organizing them according to assessment and treatment formulation, treatment implementation and monitoring, and evaluation. Also, numerous practice cases and detailed exercises offer a complete grasp of crucial concepts and techniques. This new edition reflects contemporary developments in practice research, such as an emphasis on empirical or evidence-based practice; the importance of evaluation within the managed-care environment; the role of social work ethics in practice research; the value of qualitative research methodology for particular aspects of monitoring and evaluation; and the role of computer technology and the use of the Internet.

In the digital era, users from around the world are constantly connected over a global network, where they have the ability to connect, share, and collaborate like never before. To make the most of this new environment, researchers and software developers must understand users ' needs and expectations. *Social Media and Networking: Concepts, Methodologies, Tools, and Applications* explores the burgeoning global community made possible by Web 2.0 technologies and a universal, interconnected society. With four volumes of chapters related to digital media, online engagement, and virtual environments, this multi-volume reference is an essential source for software developers, web designers, researchers, students, and IT specialists interested in the growing field of digital media and engagement. This four-volume reference includes various chapters covering topics related to Web 2.0, e-governance, social media activism, internet privacy, digital and virtual communities, e-business, customer relationship management, and more.

The Handbook of Human and Social Conditions in Assessment is the first book to explore assessment issues and opportunities occurring due to the real world of human, cultural, historical, and societal influences upon assessment practices, policies, and statistical modeling. With chapters written by experts in the field, this book engages with numerous forms of assessment: from classroom-level formative assessment practices to national accountability and international comparative testing practices all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the Handbook of Human and Social Conditions in Assessment is written for researchers, educators, and policy makers interested in how social and human complexity affect assessment at all levels of learning. Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters, followed by a discussant chapter that synthesizes key ideas and offers directions for future research. Taken together, the chapters in this volume demonstrate that teachers, test creators, and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes.

As face-to-face interaction between student and instructor is not present in online learning environments, it is increasingly important to understand how to establish and maintain social presence in online learning. *Student-Teacher Interaction in Online Learning Environments* provides successful strategies and procedures for developing policies to bring about an awareness of the practices that enhance online learning. This reference book provides building blocks to help improve the outcome of online coursework and discusses social presence to help improve performance, interaction, and a sense of community for all participants in an online arena. This book is of essential use to online educators, administrators, researchers, and students.

Organized around four commonplaces of education—learners and learning, subject matter, teachers and teaching, and classroom environment—Elementary Social Studies provides a rich and ambitious framework to help social studies teachers achieve powerful teaching and learning results. By blending the theoretical and the practical, the authors deeply probe the basic elements of quality instruction—planning, implementation, and assessment—always with the goal of creating and supporting students who are motivated, engaged, and thoughtful. Book features and updates to the fourth edition include: • Two new chapters on using the Inquiry Design Model (IDM) to understand inquiry-based teaching and learning and to develop IDM inquiries. • Revised chapter on ideas and questions. • Revised chapter on literacy to more fully incorporate media literacy and digital citizenship. • Real-classroom narratives introduce chapters and provide in-depth access to teaching and learning contexts. • Practical curriculum and resource suggestions for the social studies classroom. • End-of-chapter summaries and annotated teaching resources.
