Three young men meet in college and begin a company that revolutionizes the sports world. Ten years later, they're all billionaires, but they're still alone. Follow the three men through their journeys to find true love as they each find their perfect bride.Steven: When the younger sister of a woman he used to date shows up at his house with a child she claims is his, he convinces her they'd be better off living with him than simply taking child support from him. He finds himself wildly attracted to the new "nanny" and sets out to win her heart.Justin: When a relatively new employee comes to his office to talk about some trouble in the Human Resources department, Justin feels such a strong physical attraction to her, he's ready to throw all his beliefs about dating a subordinate out the window. Sarah takes one look at Justin, and knows she wants nothing more than to be his. Will they be able to get past the fact they work closely together and make the relationship work?Cody: After being rear-ended by a beautiful woman on his way home from the Super Bowl, Cody realizes he's found the only woman in the world who is just right for him. How could he possibly have fallen for the only woman in the world so independent that his billions are a liability?

"Myths & Facts" offers documented historical facts about all aspects of the Arab-Israeli conflict and has been updated for 2012 to include the latest information about Israel's security situation, the wars with Hezbollah and Hamas and the continued delegitimization of Israel on university campuses

A journalist and word aficionado salutes the 100-year history and pleasures of crossword puzzles Since its debut in The New York World on December 21, 1913, the crossword puzzle has enjoyed a rich and surprisingly lively existence. Alan Connor, a comic writer known for his exploration of all things crossword in The Guardian, covers every twist and turn: from the 1920s, when crosswords were considered a menace to productive society; to World War II, when they were used to recruit code breakers; to their starring role in a 2008 episode of The Simpsons. He also profiles the colorful characters who make up the interesting and bizarre subculture of crossword constructors and competitive solvers, including Will Shortz, the iconic New York Times puzzle editor who created a crafty crossword that appeared to predict the outcome of a presidential election, and the legions of competitive puzzle solvers who descend on a Connecticut hotel each year in an attempt to be crowned the American puzzle-solving champion. At a time when the printed word is in decline, Connor marvels at the crossword's seamless transition onto Kindles and iPads, keeping the puzzle one of America's favorite pastimes. He also explores the way the human brain processes crosswords versus computers that are largely stumped by clues that require wordplay or a simple grasp of humor. A fascinating examination of our most beloved linguistic amusement—and filled with tantalizing crosswords and clues embedded in the text—The Crossword Century is sure to attract the attention of the readers who made Word Freak and Just My Type bestsellers.

This book provides new insights about learning by synthesising existing and emerging findings from cognitive and brain science.

One of the 20th century's enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world, and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendía family. It is a rich and brilliant chronicle of life and death, and the tragicomedy of humankind. In the noble, ridiculous, beautiful, and tawdry story of the Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility -- the variety of life, the endlessness of death, the search for peace and truth -- these universal themes dominate the novel. Whether he is describing an affair of passion or the voracity of capitalism and the corruption of government, Gabriel García Márquez always writes with the simplicity, ease, and purity that are the mark of a master. Alternately reverential and comical, One Hundred Years of Solitude weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an accounting of the history of the human race.

Provides a chapter of easy to follow and actionable tips for each of the areas identified as leadership competencies including: dealing with ambiguity, conflict management, and strategic agility.

Sixty-four million people do it at least once a week. Nabokov wrote about it. Bill Clinton even did it in the White House. The crossword puzzle has arguably been our national obsession since its birth almost a century ago. Now, in Crossworld, writer, translator, and lifelong puzzler Marc Romano goes where no Number 2 pencil has gone before, as he delves into the minds of the world's cleverest crossword creators and puzzlers, and sets out on his own quest to join their ranks. While covering the American Crossword Puzzle Tournament for the Boston Globe, Romano was amazed by the skill of the competitors and astonished by the cast of characters he came across—like Will Shortz, beloved editor of the New York Times puzzle and the only academically accredited “enigmatologist” (puzzle scholar); Stanley Newman, Newsday’s puzzle editor and the fastest solver in the world; and Brendan Emmett Quigley, the wickedly gifted puzzle constructor and the Virgil to Marc’s Dante in his travels through the crossword inferno. Chronicling his own journey into the world of puzzling—even providing tips on how to improve crosswording skills—Romano tells the story of crosswords and word puzzles themselves, and of the colorful people who make them, solve them, and occasionally become consumed by them. But saying this is a book about puzzles is to tell only half the story. It is also an explanation into what crosswords tell us about ourselves—about the world we live in, the cultures that nurture us, and the different ways we think and learn. If you’re a puzzler, Crossworld will enthrall you. If you have no idea why your spouse send so much time filling letters into little white squares, Crossworld will tell you – and with luck, save your marriage. CROSSWORD | by Marc Romano ACROSS 1. I am hopelessly addicted to the New York Times crossword puzzle. 2. Like many addicts, I was reluctant to admit I have a problem. 3. The hints I was heading for trouble came, at first, only occasionally. 4. The moments of panic when I realized that I might not get my fix on a given day. 5. The toll on relationships. 6. The strained friendships. 7. The lost hours I could have used to do something more productive. 8. It gets worse, too. DOWN 1. You’re not just playing a game. 2. You’re constantly broadening your intellectual horizons. 3. You spend a lot of time looking at and learning about the world around you. 4. You have to if you want to develop the accumulated store of factual information you’ll need to get through a crossword puzzle. 5. Puzzle people are nice because they have to be. 6. The more you know about the world, the more you tend to give all things in it the benefit of the doubt before deciding if you like them or not. 7. I’m not saying that all crossword lovers are honest folk dripping with goodness. 8. I would say, though, that if I had to toss my keys and wallet to someone before jumping off a pier to save a drowning girl, I’d look for the fellow in the crowd with the daily crossword in his hand.

Visiting a young boy on earth, an extraterrestrial delivers an environmental message of hope from the stars.

Oceans account for 50% of the anthropogenic CO2 released into the atmosphere. During the past 15 years an international programme, the Joint Global Ocean Flux Study (JGOFS), has been studying the ocean carbon cycle to quantify and model the biological and physical processes whereby CO2 is pumped from the ocean's surface to the depths of the ocean, where it can remain for hundreds of years. This project is one of the largest multi-disciplinary studies of the oceans ever carried out and this book synthesises the results. It covers all aspects of the topic ranging from air-sea exchange with CO2, the role of physical mixing, the uptake of CO2 by marine algae, the fluxes of carbon and nitrogen through the marine food chain to the subsequent export of carbon to the depths of the ocean. Special emphasis is laid on predicting future climatic change.

Artificial Intelligence: A Modern Approach offers the most comprehensive, up-to-date introduction to the theory and practice of artificial intelligence. Number one in its field, this textbook is ideal for one or two-semester, undergraduate or graduate-level courses in Artificial Intelligence.
