The international legal status of corporations is a contentious issue, as they do not easily fit within a system traditionally designed around states. This book assesses the ways in which corporations are bound by international human rights and environmental law, and the form their obligations take.

Introduction to Geography: People, Places, & Environment, Fifth Edition emphasizes that what happens in places depends increasingly on what happens among places--and that mapped patterns can be understood only by recognizing the movement that creates and continuously rearranges them. The authors emphasize the integration of various aspects of geographic processes and systems by discussing what happens in one set of geographic processes and how that affects others. For example, what happens in economic systems affects environmental conditions; what happens to climate affects political dynamics. In this text, the major tools, techniques, and methodological approaches of the discipline of geography are introduced.

The contributions of Understanding the Sources of Early Modern and Modern Commercial Law show an excellent assemblage of sources which historians of commercial law use. Besides normative sources, others are often needed to complement them.

In this important work, Dr. Felipe Fierro offers a comprehensive view on the subject of Introduction to the Study of Law, in which he revives the use of Gnoseology, Philosophy, History and Logic as Auxiliary Sciences; and exposes how the abandonment of such has contributed to the exponential growth of Skepticism and Relativism, currently prevailing in the legal world. The above, through extensive experience in teaching Law from the Aristotelian-Thomistic platform, based on the elementary assumption that we must first prove the existence of the object of study, and contrast main legal branches in topics such as: what is Law?, why is Science?, what are Law, Justice, Facultative rights and the Common Good?; supported by extensive and select bibliography. In addition, the being, nature, concept, essence and properties of the sources, fundamentals and classification are described. But important elements such as knowledge, order, principles, Jurisprudence, and Natural law, fundamental legal concepts, the legislative process, the Constitution, interpretation and others are not absent. Morality and Legal Law are obligatory markers, which although considered in their own field, are not excluded, but different as to object and method. Predominantly, Justice is exposed as one of the great values of the Law, and main theories in order to offer future lawyers the basis regarding the current Science of Law and its significance.

Companies have to innovate to stay competitive, and they have to collaborate with other organizations to innovate effectively. Although the benefits of "open innovation" have been described in detail before, underlying mechanisms how companies can be successful open innovators have not been understood well. A growing community of innovation management researchers started to develop different frameworks to understand open innovation in a more systematic way. This book provides a thorough examination of research conducted to date on open innovation, as well as a comprehensive overview of what will be the most important, most promising and most relevant research topics in this area during the next decade. "Open Innovation: Researching a new paradigm" (OUP 2006) was the first initiative to bring open innovation closer to the academic community. Open innovation research has since then been growing in an exponential way and research has evolved in different and unexpected directions. As the research field is growing, it becomes increasingly difficult for young (and even experienced scholars) to keep an overview of the most important trends in open innovation research, of the research topics that are most promising for the coming years, and of the most interesting management challenges that are emerging in organizations practicing open innovation. In the spirit of an open approach to innovation, the editors have engaged other scholars and practitioners to contribute some of their interesting insights in this book. Companies have to innovate to stay competitive, and they have to collaborate with other organizations to innovate effectively. Although the benefits of "open innovation" have been described in detail before, mechanisms underlying how companies can be successful "open innovators" have not been understood well. A growing community of innovation management researchers started to develop different frameworks to understand open innovation in a more systematic way.

Using new research on higher education in the UK, Canada, Chile and Italy, this rigorous comparative study investigates key episodes of student protests against neoliberal policies and practices in today's universities. As well as examining origins and outcomes of higher education reforms, the authors set these waves of demonstrations in the wider contexts of student movements, political activism and social issues, including inequality and civil rights. Offering sophisticated new theoretical arguments based on fascinating empirical work, the insights and conclusions revealed in this original study are of value to anyone with an interest in social, political and related studies.

An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.
