The aim of Methods in Diabetes Research is to provide ready access to the wide array of investigative techniques applicable to research in this area. The first volume, published in three parts, was devoted to laboratory techniques. The present volume deals with clinical methods. It is divided into three parts, i.e. pathophysiology, therapy and complications with a total of 35 contributions by eminent workers in the field. In many areas of clinical research, adequate methods do not exist, and included in this volume are discussions on the kinds of methods

needed and the difficulties inherent in their development. In addition, several contributions go into considerable detail describing the problems of dealing with human subjects and hospital administrators. Although not usually considered 'scientific' these issues often limit the productivity of clinical investigations.

The most thorough major academic textbook available, this classic text presents the most important research studies in the field. The author also integrates engaging first-person accounts from patients, physicians, and other health care providers throughout the text. A much greater number of first person accounts and updated examples are added to the new fourteenth edition. Other updates include: • Coverage of Zika, Ebola, MERS, and updates on other pandemics • Expanded discussion of obesity as a disease • Coverage of the widening gap in life expectancy between the rich and the poor • New information on the decline of life expectancy among American white women, especially those who live in rural counties • New material on biomarkers, gene–environment interaction, and stress • Analysis of the role of the hidden curriculum in medical schools • Exiting the Affordable Care Act

Colonized since the 1600s, Taiwan is largely a nation of settlers, yet within its population of twenty-three million are 500,000 Aboriginal people. In their quest to learn about disease and evolution, genetic researchers have eagerly studied this group over the past thirty years but have often disregarded the rights of their subjects. Examining a troubling revival of racially configured genetic research and the questions of sovereignty it raises, *Living Dead in the Pacific* details a history of exploitation and resistance that represents a new area of conflict

Current Legal Issues, like its sister volume Current Legal Problems (now available in journal format), is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and
