the #1 detective series of the past twenty-five years, now one of PBS's "100 Great American Reads" Alex Cross is a homicide detective with a Ph.D. in psychology. He works and lives in the ghettos of D. C. and looks like Muhammad Ali in his prime. He's a tough guy from a tough part of town who wears Harris Tweed jackets and likes to relax by banging out Gershwin tunes on his baby grand piano. But he also has two adorable kids of his own, and they are his own special vulnerabilities. Jezzie Flanagan is the first woman ever to hold the highly sensitive job as supervisor of the Secret Service in Washington. Blond, mysterious, seductive, she's got an outer shell that's as tough as it is beautiful. She rides her black BMW motorcycle at speeds of no less than 100 mph. What is she running from? What is her secret? Alex Cross and Jezzie Flanagan are about to have a forbidden

love affair-at the worst possible time for both of them. Because Gary Soneji, who wants to commit the "crime of the century," is playing at the top of his game. Soneji has outsmarted the FBI, the Secret Service, and the police. Who will be his next victim? Gary Soneji is every parent's worst nightmare. He has become Alex Cross's nightmare. And now, reader, he's about to become yours.

Told in the first person as if written by Arabella herself, she describes how she was the first spider to spin a web in space in 1973, and even made it into the Guinness Book of World Records.

Reading Arabella's diary and the story, we learn how spiders spin webs and why this experiment, suggested by a high school student, was important.

her back porch. She keeps watch on the spider, recording its hunting, feeding, and mating activities in her diary. Readers will follow along as the narrator observes jumping spiders' behavior up close, including the development from eggs to babies through molting and becoming an adult spider. Colorful photos, diagrams, and clear, age-appropriate text will engage young readers as they explore the life cycle, natural habitat, physical characteristics, diet, and behavior of these incredible creatures. The diary format models scientific observation and critical thinking--and encourages children to keep notebooks recording their own investigations into the natural world.
