Speech-Language Pathology - 11th Edition

What assessment tests are available to speech therapists? How are they best used? Originally published in 1993, Assessment in Speech and Language Therapy was designed to guide speech therapists in choosing the most appropriate assessments for evaluation, monitoring and intervention at the time. By providing guidance on defining the issues in assessment, it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients. The major issues involved are discussed in detail, in particular how to make sure that assessments are relevant to individual needs. This title will be invaluable to all speech therapists and clinical psychologists working in this area.

What does this manual offer? Provides a concise introduction to the principles of Dynamic Assessment to make clear the enormous benefits of applying this approach to the assessment of language. Presents a full example of a Dynamic Assessment of Sentence Structure (DASS) to demonstrate how the principles are implemented and the findings applied to plan more effective interventions. All the materials for the DASS are included so that you can use this assessment immediately. Includes numerous templates, generic prompt sheets, score sheets and materials that you can adapt for use in Dynamic Assessments that you devise yourself. Written by Dr Natalie Hasson, a highly experienced Speech and Language Therapist who leads the field in researching the dynamic assessment of language, this is the only Dynamic Assessment manual of its kind.

A GUIDE TO CLINICAL ASSESSMENT AND PROFESSIONAL REPORT WRITING IN SPEECH-LANGUAGE PATHOLOGY. 1E not only provides guidance for the often overwhelming process of assessing speech and language disorders but also offers robust diagnostic report writing tools in one user-friendly resource. Organized by disorder, this book is the only one to provide a sample report for each of the major communicative disorders discussed. It also includes a chapter devoted to basic report writing skills and grammar. The assessment aspects of the book offer an in-depth chapter on counseling, a detailed and comprehensive chapter on dysphasia for both pediatric and adult populations, and a clear and practical chapter on assessment of accent. Each chapter is written by experts in their area of communication disorders and provides the following information: background and characteristics of the disorder; parameters for assessment; pertinent interview questions; an inventory and explanation of relevant formal and informal assessment measures in narrative and table format; a section on differential diagnosis to assist in teasing out the specific problem, and a sample case history with assessment tools chosen for that vignette along with rationale for making such selections. All this information is woven into a sample diagnostic report and a similar assignment is provided for practice, making this an ideal resource for ESL learners as well as students preparing for the praxis. Every chapter includes a list of key vocabulary and a glossary to familiarize your students with the professional vernacular relevant for writing diagnostic reports. This book is a practical compendium of assessment instruments and intervention ideas for school-based speech-language pathology who are eager to take their practice beyond traditional language tests and caseload concerns. The manual focuses on three areas of language where language impaired children in elementary school need particular help: phonological awareness, narrative skills, and advanced literacy skills (identifying and stating the main idea, for example). Inside, the reader will find non-standardized assessment tasks, sample interventions activities, sample goals, and objectives and sample lesson plans. These tools provide a framework onto which the clinician can graft activities and materials appropriate for individual children. This is a practical, useful, reality based book of assessment tasks and intervention ideas. It will also provide ideas for helping children who lack these abilities, for writing appropriate goals and objectives and for sharing information about the child's progress with teachers and parents.
