The Physicists is part of L.A. Theatre Works' Relativity Series featuring science-themed plays. Major funding for the Relativity Series is provided by the Alfred P. Sloan Foundation to enhance public understanding of science and technology in the modern world.

The world's greatest physicist, Johann Wilhelm Mobius, is in a madhouse, haunted by recurring visions of King Solomon. He is kept company by two other equally deluded scientists: one who thinks he is Einstein, another who believes he is Newton. It soon becomes evident, however, that these three are not as harmlessly lunatic as they appear. Are they, in fact, really mad? Or are they playing some murderous game, with the world as the stake? For Mobius has uncovered the mystery of the universe--and therefore the key to its destruction--and Einstein and Newton are vying for this secret that would enable them to rule the earth.

Theatre program.

Set in a madhouse, three male patients, all nuclear physicists, believe they are Newton, Einstein and the third has visions from King Solomon. Are they really mad, or playing some murderous game with the world at stake?

A comedy melodrama concerning three mad physicists in a Swiss sanatorium.

Here is a lively history of modern physics, as seen through the lives of thirty men and women from the pantheon of physics. William H. Cropper vividly portrays the life and accomplishments of such giants as Galileo and Isaac Newton, Marie Curie and Ernest Rutherford, Albert Einstein and Niels Bohr, right up to contemporary figures such as Richard Feynman, Murray Gell-Mann, and Stephen Hawking. We meet scientists--all geniuses--who could be gregarious, aloof, unpretentious, friendly, dogged, imperious, generous to colleagues or contentious rivals. As Cropper captures their personalities, he also offers vivid portraits of their great moments of discovery, their bitter feuds, their relations with family and friends, their religious beliefs and education. In addition, Cropper has grouped these biographies by discipline--mechanics, thermodynamics, particle physics, and others--each section beginning with a historical overview. Thus in the section on quantum mechanics, readers can see how the work of Max Planck influenced Niels Bohr, and how Bohr in turn influenced Werner Heisenberg. Our understanding of the physical world has increased dramatically in the last four centuries. With Great Physicists, readers can retrace the footsteps of the men and women who led the way.

In Friedrich Dürrenmatt's experimental thriller The Assignment, the wife of a psychiatrist has been raped and killed near a desert ruin in North Africa. Her husband hires a woman named F. to reconstruct the unsolved crime in a documentary film. F. is soon unwittingly thrust into a paranoid world of international espionage where everyone is watched—including the watchers. After discovering a recent photograph of the supposed murder victim happily reunited with her husband, F. becomes trapped in an apocalyptic landscape riddled with political intrigue, crimes of mistaken identity, and terrorism. F.'s labyrinthine quest for the truth is Dürrenmatt's fictionalized warning against the dangers of a technologically advanced society that turns everyday life into one of constant scrutiny. Joel Agee's elegant translation will introduce a fresh generation of English-speaking readers to one of European literature's masters of language, suspense, and dystopia. "The narrative is accelerated from the start. . . . As the novella builds to its horripilating climax, we realize the extent to which all values have thereby been inverted. The Assignment is a parable of hell for an age consumed by images."—New York Times Book Review "His most ambitious book . . . dark and devious . . . almost obsessively drawn to mankind's most fiendish crimes."—Chicago Tribune "A tour-de-force . . . mesmerizing."—Village Voice

This volume offers bracing new translations of two precursors to the modern detective novel by Friedrich Dürrenmatt, whose genre-bending mysteries recall the work of Alain Robbe-Grillet and anticipate the postmodern fictions of Paul Auster and other contemporary neo-noir novelists. Both mysteries follow Inspector Barlach as he moves through worlds in which the distinction between crime and justice seems to have vanished. In The Judge and His Hangman, Barlach forgoes the arrest of a murderer in order to manipulate him into killing another, more elusive criminal. And in Suspicion, Barlach pursues a former Nazi doctor by checking into his clinic with the hope of forcing him to reveal himself. The result is two thrillers that bring existential philosophy and the detective genre into dazzling convergence.
