Many school districts across this great nation are facing serious patterns of underachievement of students who do not fit well in a mainstream educational environment. The purpose of this qualitative phenomenological research study was to explore the perceptions and experiences of graduates from a credit-recovery nontraditional alternative high school that influenced his or her graduation. Nationally, many high school students are not earning sufficient credits to remain on grade level with their freshman level cohort. These at-risk students need options with stronger incentives to obtain high school credits and meet graduation requirements. Credit-recovery nontraditional alternative high schools involve an at-risk student population who are at a greater risk of academic, social, and emotional struggles. These students benefit from additional support that a nontraditional setting offers. This study

involved interviewing 12 high school graduates who attended and graduated from a credit-recovery nontraditional alternative high school. There was a diversified group by age and other demographics representing five graduating classes. With this research study, the investigator determined graduates' perceptions of credit recovery in their nontraditional alternative high school were overwhelmingly positive. The lived experiences explored in this study may help school leaders, policy makers, teachers, staff, parents, and community partners understand the unique needs of this population.

How might digital technology and notably smart technologies based on artificial intelligence (AI), learning analytics, robotics, and others transform education? This book explores such question. It focuses on how smart technologies currently change education in the classroom and the management of educational organisations and systems.

This practical guide is designed to help collaborative teams at all grade levels address the critical question "How will we extend the learning for students who are already proficient?" Mark Weichel, Blane McCann, and Tami Williams identify five elements of personalized learning, along with five instructional strategies for extended, differentiated instruction, that give all students the opportunity to reach their personal best. Rethink how to respond to proficient students in a competency-based curriculum: Realize the importance of addressing the fourth critical question of Professional Learning Communities at Work™. Learn the five elements of personalized learning: knowing your learners, allowing student voice and choice, implementing flexibility, using data, and integrating technology. Explore five differentiated instruction strategies for extending the learning for high-ability and high-potential students: curriculum compacting, flexible grouping, product choices, tiered assignments, and multilevel learning stations. Understand how collaborative teams in a professional learning community (PLC) can maximize student engagement, motivating students to learn beyond the essential standards. Utilize individual and collaborative team reflection tools, and read stories based on real-life teachers' experiences implementing the elements of personalized learning in classrooms. Contents: Introduction Chapter 1: Reframing Chapter 2: Personalized Learning Chapter 3: Instructional Strategies That Support Question 4 Students Chapter 4: Knowing Your Learners Chapter 5: Allowing Voice and Choice Chapter 6: Implementing Flexibility Chapter 7: Using Data Chapter 8: Integrating Technology Chapter 9: Bringing It All Together

"A bold and subversive retelling of the goddess's story," this #1 New York Times bestseller is "both epic and intimate in its scope, recasting the most infamous female figure from the Odyssey as a hero in her own right" (Alexandra Alter, The New York Times). In the house of Helios, god of the sun and mightiest of the Titans, a daughter is born. But Circe is a strange child -- not powerful, like her father, nor viciously alluring like her mother. Turning to the world of mortals for companionship, she discovers that she does possess power -- the power of witchcraft, which can transform rivals into monsters and menace the gods themselves. Threatened, Zeus banishes her to a deserted island, where she hones her occult craft, tames wild beasts and crosses paths with many of the most famous figures in all of mythology, including the Minotaur, Daedalus and his doomed son Icarus, the murderous Medea, and, of course, wily Odysseus. But there is danger, too, for a woman who stands alone, and Circe unwittingly draws the wrath of both men and gods, ultimately finding herself pitted against one of the most terrifying and vengeful of the Olympians. To protect what she loves most, Circe must summon all her strength and choose, once and for all, whether she belongs with the gods she is born from, or the mortals she has come to love. With unforgettably vivid

characters, mesmerizing language, and page-turning suspense, *Circe* is a triumph of storytelling, an intoxicating epic of family rivalry, palace intrigue, love and loss, as well as a celebration of indomitable female strength in a man's world. #1 New York Times Bestseller -- named one of the Best Books of the Year by NPR, the Washington Post, People, Time, Amazon, Entertainment Weekly, Bustle, Newsweek, the A.V. Club, Christian Science Monitor, Refinery 29, BuzzFeed, Paste, Audible, Kirkus, Publishers Weekly, Thrillist, NYPL, Self, Real Simple, Goodreads, Boston Globe, Electric Literature, BookPage, the Guardian, Book Riot, Seattle Times, and Business Insider.

Thomas Hardy (2nd June 1840 – 11th January 1928) was an English novelist and poet. He was influenced by Romanticism and it has been reflected in his novels and poetry. He was criticised by the Victorian society on the issue of the declining status of rural people in Britain. He was basically a poet. Initially he started writing poems. But he gained fame after his novels, such as *Far from the Madding Crowd*, *The Mayor of Casterbridge*, *Tess of the d'Urbervilles* and *Jude the Obscure*. Two of his novels, *Tess of the d'Urbervilles* and *Far from the Madding Crowd*, were listed in top 50 on the BBC survey- *The Big Road*. The story of *Tess of the d'Urbervilles* revolves around a 16 year old very simple girl, named Tess Durbeyfield, who is the eldest daughter of John and Joan Durbeyfield. Since the family suffers acute financial crisis, so they approach the d'Urbervilles family who are holding huge land and having lot of money. There Tess meets Alec d'Urberville, who finds himself attracted to Tess. When Tess started working as a caretaker of Alec's blind mother's poultry farm, Alec gets an opportunity to rape her. After that there are many ups and down in Tess's life. She meets Mr. Crick for another job. She also meets one more fellow Angel Clare, who is a travelling farmer's apprentice. They marry each other. But after knowing her story, again there is a turn in Tess's life. How she manages all such situation, how she meets all the financial aspects, lot of things happen with Tess. Even Alec and Angel both start searching for Tess. So, the story has become very interesting, full of climax. How Tess meets Alec or Angel? Whether she gets involved with any of these two again? There are so many presumptions. Readers will surely enjoy the story, full of suspense and never expected ups & downs in the life of all the characters. At last, how Angel helps Tess and her family is the climax. Go ahead and must grab the book. A must read book for self development and how to be a good leader.

The Practice of Statistics is the most trusted program for AP® Statistics because it provides teachers and students with everything they need to be successful in the statistics course and on the AP® Exam. With the expert authorship of high school AP® Statistics veterans, Daren Starnes and Josh Tabor and their supporting team of AP® teacher/leaders, *The Practice of Statistics, Sixth edition (TPS6)* has been crafted to follow the topical outline of the AP® Statistics course with careful attention paid to the style, nomenclature, and language used on the AP® Statistics exam. It combines a data analysis approach with the power of technology, innovative pedagogy, and an extensive support program built entirely for the sixth edition. New resources, including a robust online homework program and an extensively revised TestBank, give teachers and students everything they need to realize success on the exam and in the course.

The goal of this book is to bring together the concept of self-efficacy theory with practical how-to strategies for both teachers and parents to use in heightening their students' levels of self-efficacy. The book examines how self-efficacy theory relates to the acquisition of mathematical competence. The text also provides specific and practical how-to strategies for both teachers and parents in applying these principles to classroom mathematics instruction and activities. The self-efficacy practices and applications to mathematics are also suitable for

families working with learners outside the school environment. Acquiring mathematical skills requires more than knowing arithmetic tables, memorizing rules, and knowing proofs. It requires a basic belief that one is capable of obtaining this information, making sense of it, and applying and generalizing it in mathematical problems. In addition, a student must believe that obtaining these skills leads to a positive outcome, whether it is perceived to be a good or passing grade, comfort-level in tackling mathematical problems, being able to advance to the next mathematics course, being able to score highly on the math section of the SAT and/or be competitive for a desired job. The ability of students to achieve and exceed grade level competence in mathematics is addressed through the lens of Albert Bandura's Self-Efficacy Theory. This theoretical position states that one will persist in mastering a behavior (in this case, mastering mathematical principles and skills), in the face of obstacles or failures to the extent that one believes he or she has the ability to do so, and that there is a desired outcome for doing so. The research literature on the role of self-efficacy in mathematic instruction is examined to demonstrate the validity of using this concept to increase student (and parent/teacher) confidence in learning and applying grade-appropriate math content. Specific teaching methodologies will be provided that infuse self-efficacy strategies for students. Lastly, teachers and parents are provided strategies to increase their own self-efficacy when it comes to conveying mathematics principles to their child or student, as well as strategies to assess their students' level of self-efficacy over time. Teaching and learning mathematics so that students achieve success at their grade level or above can present a variety of challenges. One barrier that affects learners is the belief that one is not capable of learning mathematics or not naturally talented in the field, not a math person. As a result, learners may not believe they are capable of a positive outcome for achieving mathematics success. This book is an important resource for pre-service and in-service teachers, as well as families in applying the theory of self-efficacy to support learners in becoming confident and assured in their ability to understand and apply mathematical principles and procedures. Coupled with classroom ready mathematics instructional strategies, the book provides readers with the background, tools and strategies needed to carry content success and confidence forward to remain persistent in solving all future mathematical problems.

Mrs. Louise Mallard, afflicted with a heart condition, reflects on the death of her husband from the safety of her locked room. Originally published in Vogue magazine, "The Story of an Hour" was retitled as "The Dream of an Hour," when it was published amid much controversy under its new title a year later in St. Louis Life. "The Story of an Hour" was adapted to film in *The Joy That Kills* by director Tina Rathbone, which was part of a PBS anthology called *American Playhouse*. HarperPerennial Classics brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperPerennial Classics collection to build your digital library.

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich

library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python, 2nd Edition*.
