Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, and addressing the key areas of development-math, reading, verbal communication, science, self-awareness, and social skills-the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun--yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.

Discusses the growing trend toward accelerated learning and the pressure put upon parents to meet constant expectations, introducing creative games that parents can play with their child to enhance development.

In Play=Learning, top experts in child development and learning contend that in over-emphasizing academic achievement, our culture has forgotten about the importance of play for children's development.

Today's children will forge careers that look nothing like those their parents and grandparents knew. Even the definitions of "career" and "job" are changing as people create new businesses and services. Although these changes are well underway, our education system in the U.S. lags behind and still subscribes to the idea that content is king. This exclusive focus on content is reflected in what we test, how we teach, and even the toys we offer our children. Employers want to hire excellent communicators, critical thinkers, and innovators—in short, they want brilliant people. So what can we do, as parents, to help our children be brilliant and successful? Golinkoff and Hirsh-Pasek provide a science-based framework for how we should be teaching children in and outside of school. Using fun and engaging examples, the authors introduce the 6Cs—collaboration, communication, content, critical thinking, creative innovation, and confidence—along with tips to optimize children's development in each area. These skills will make up the straight-A report card for success in the 21st century. Book jacket.

'A compelling book' - Observer '...an exceptionally clear and comprehensive synthesis of current research findings made readily comprehensible to both parents and teachers' - Dr M Levy in the Foreword to the French edition Mia Kellmer Pringle was commissioned by the Department of Social Security: To prepare a comprehensive document about the development needs of all children, about the ways in which these needs are normally met, and about the consequences for emotional, intellectual, social and physical growth and development of children when, for some reason or another, these needs are not adequately met Whilst the central themes of this classic text remain as relevant as ever, over forty new references have now been added and many passages have been substantially updated to reflect current thinking and to take account of new research. The Needs of Children, published in seven countries, continues to be a principal work in its field and a landmark in our understanding of childhood.

In their first three years of life, babies face the most complex learning endeavor they will ever undertake as human beings: They learn to talk. Now, as researchers make new forays into the mystery of the development of the human brain, Golinkoff and Hirsh-Pasek, both developmental psychologists and language experts, offer parents a powerfully insightful guidebook to how infants—even while in the womb—begin to learn language. Along the way, the authors provide parents with the latest scientific findings, developmental milestones, and important advice on how to create the most effective learning environments for their children. This book takes readers on a fascinating, vitally important exploration of the dance between nature and nurture, and explains how parents can help their children learn more successfully.

A psychotherapist and educator shares practical advice and insights into dealing with the everyday problems of raising children, explaining how to encourage compassion and respect in a child, develop a child's sense of self-discipline, avoid no-win discipline styles, and more. Original.

Harness the power of play in building learning environments that help students thrive In Why Play Works, expert educator and author Jill VIALET shares her insights from a career of promoting play. Designed to support schools, education professionals and parents in promoting play as an essential tool for increasing social connection amongst their students, you'll find out why playing is a behavior that's helped children learn to navigate the demands of social interaction for eons, and how we can keep it central to their school experience even as we return from the COVID-19 pandemic. In this book, you'll discover: Why it's important to intentionally integrate play into day-to-day school operations because of its ability to help students learn to manage risks, develop greater self awareness, and build confidence
