How to rig an election without getting caught Elections In Africa A Data

Elections in Africa is the first volume of a series of election data handbooks published by OUP; it covers all the 53 states in Africa. Elections have always been an integral part of post independence African politics and have assumed the utmost importance in the course of recent democratization processes. However, comparative research on political development in Africa lacks reliable electoral data. Elections in Africa fills this gap.

In Liberia, 1,641,922 people voted in the first-round election but only 1,218,124 (60.6%) returned for the run-off. A lesson to be learnt is that elections marred with corruption allegations, and halted by courts, affect the morale of voters and see less voters coming to polls in re-run and/or run-off elections.

Post-election era in Africa has been characterized by violent clashes between opposition protestors and security forces loyal to ruling political hegemonies. These clashes are usually instigated by accusations of electoral manipulation and fraud (rigging elections). In the last 10 years, these are few facts of electoral crises across Africa:

Elections in Angola take place within the framework of a multi-party democracy and a presidential system. The National Assembly is directly elected by voters, whilst the leader of the largest party or coalition in the National Assembly automatically becomes President.

Elections in Angola - Wikipedia

General elections were held in Angola on 29 and 30 September 1992 to elect a President and National Assembly, the first time free and multi-party elections had been held in the country. They followed the signing of the Bicesse Accord on 31 May 1991 in an attempt to end the 17-year-long civil war. Voter turnout was 91.3% for the parliamentary election and 91.2% for the

Elections have always been an integral part of post-independence African politics and have assumed utmost importance in the course of recent democratisation processes. However, comparative research on the political development in Africa lacks reliable electoral data. Elections in Africa fills this gap. The handbook is the only reliable source for African elections from independence to present. In the first volume of this series, Elections in Africa presents a country-by-country study of African nations that provides a comparative introduction on elections and electoral systems. Each country chapter examines the history of the institutional and electoral arrangements, the evolution of suffrage and current electoral provisions. Precise and exhaustive data on national elections and referendums are presented comparatively.

The book provides a definitive and comprehensive set of data on elections and electoral systems in order to facilitate comparative research. Data is presented in a systematic manner allowing for both historical and cross-national comparisons.

Publisher Description

Democratic transitions in the early 1990s introduced a sea change in Sub-Saharan African politics. Between 1990 and 2015, several hundred competitive legislative and presidential elections were held in all but a handful of the region's countries. This book is the first comprehensive comparative analysis of the key issues, actors, and trends in these elections over the last quarter century. The book asks: what motivates African citizens to vote? What issues do candidates campaign on? How has the turn to regular elections promoted greater

democracy? Has regular electoral competition made a difference for the welfare of citizens? The authors argue that regular elections have both caused significant changes in African politics and been influenced in turn by a rapidly changing continent - even if few of the political systems that now convene elections can be considered democratic, and even if many old features of African politics persist.

A radical new approach to understanding Africa's elections: explaining why politicians, bureaucrats and voters so frequently break electoral rules.

Multiparty elections have become the bellwether by which all democracies are judged, and the spread of these systems across Africa has been widely hailed as a sign

Handbook of the continent ' s progress towards stability and prosperity. But such elections bring their own challenges, particularly the often intense internecine violence following disputed results. While the consequences of such violence can be profound, undermining the legitimacy of the democratic process and in some cases plunging countries into civil war or renewed dictatorship, little is known about the causes. By mapping, analysing and comparing instances of election violence in different localities across Africa – including Kenya, Ivory Coast and Uganda – this collection of detailed case studies sheds light on the underlying dynamics and sub-national causes behind electoral conflicts, revealing them to be the result of a complex interplay between democratisation and the older, patronage-based system of ‘ Big Man ’ politics. Essential for scholars and policymakers across the social sciences and

humanities interested in democratization, peace-keeping and peace studies, Violence in African Elections provides important insights into why some communities prove more prone to electoral violence than others, offering practical suggestions for preventing violence through improved electoral monitoring, voter education, and international assistance.

This book, the second of two volumes, explores the challenges and opportunities presented by the increased presence of social media within African politics. Electoral processes in Africa have assumed new dimensions due to the influence of social media. As social media permeates different aspects of elections, it is ostensibly creating new challenges and opportunities. Most evident are the challenges of hate speech, misogyny and incivility. This book considers the impact of digital media before,

during, and after elections, as well as authorities' attempts to legislate and regulate the internet in response. Contributions to this volume analyse social media posts, transgressive images, newspaper articles, and include case studies of Algeria, Zimbabwe, Kenya, South Africa, Nigeria and Uganda. This results in the delivery of an original depiction of the use of social media in a variety of African contexts. This book will appeal to academics and students of media and communication studies, political studies, journalism, sociology, and African studies.

This book brings together fresh evidence and new theoretical frameworks in a unique analysis of the increasing role of social media in political campaigns and electoral processes across Africa. Supported by contemporary and historical cases studies, it engages with the main drives behind the

various appropriations of social media for election campaigns, organization, and voter mobilization. Contributors in this volume delve into changing and complex aspects of social media, offering an appraisal of theoretical perspectives and examining fascinating case studies which social media use is redefining elections across Africa. Contributions show that new media ecologies are resulting in new policy regimes, user behaviors, and communication models that have implications for electoral processes. The book also provides preliminary analysis of emerging forms of algorithm-driven campaigns, fake news, information distortions and other methods that undermine electoral democracy in Africa.

Saharan Africa. Why is room for political opposition in most cases so severely limited? Under what circumstances has the political opposition been able to establish itself in a legitimate role in African politics? To answer these questions this edited volume focuses on the institutional settings, the nature and dynamics within and between political parties, and the relationship between the citizens and political parties. It is found that regional devolution and federalist structures enable political opposition to organize and gain local power, as a supplement to influence at the central level. Generally, however, opposition parties are lacking in organization and institutionalization, as well as in their ability to find support in civil society and promote the issues that voters find most important. Overall, strong executive powers, unchecked by democratic institutions, in combination with deferential values and fear of conflict, undermine
