Records cataloging the healing powers of natural substances - plants, minerals, and animal byproducts - date back more than 4,000 years. There is no denying the effectiveness of traditional Chinese medicine, yet - until recently - the roots of this knowledge were largely lost in superstition and folklore. However, the use of herbs as an alternative medical treatment for many illnesses has increased steadily over the last decade, particularly since such herbs are categorized as "Natural Food Products" and are not yet subject to strict control by the FDA. Reports published in 1996 indicate that more than 10% of the US population has used herbal remedies. This book does not debate the value of Eastern or Western medicine but brings together Chinese herbal lore and Western scientific methods in a current, comprehensive treatise on the pharmacology of Chinese herbs. This second edition of The Pharmacology of Chinese Herbs presents the chemical composition, pharmacological action, toxicity, and therapeutic value of 473 herbs. The book: Classifies herbs according to their therapeutic value Informs how active ingredients in herbs may adversely interact with other herbs or drugs Evaluates which herbs have the potential for more investigation and possible use as drugs Describes the pharmacological action of each herb based on recent scientific study and describes each herb according to Chinese pharmacopoeia and folk medicine Provides a review of Chinese medical history Presents information on how to use modern chemical techniques for enhancing or modifying herbal ingredients into better agents with more strength and activity What's New in the Second Edition Discussions on: Herbs and their specific effects on the immune system Herbs and fertility/infertility Anti-cancer herbs Anti-HIV herbs Anti-malarial herbs Ginseng and ginsenosides Anti-Alzheimer herbs Herbs affecting the nervous system

SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title "Sciences and

Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

If Your Intestines Could Talk, What Would They Say? What if you could understand your own health through the perspective of your stomach? In this unprecedented work, Prof. Arnold Ehret gives voice to the stomach and reveals the foundation of human illness. In this book you will learn: About the nature of internal uncleanliness, What happens to the human stomach if it is not properly cleaned, The devastatingly negative effects of mucus-forming foods, The true meaning of Ehret's famous expression "a tragedy of nutrition," And much more! "Ehret taught that the mind governs all organic action of the physical body instinctively, and we therefore find humankind gradually evolving from the primitive stage to a higher intellectual plane. The physical and mental welfare of millions of individuals living today are desperately searching for a truthful presentation of this knowledge found only in Prof. Arnold Ehret's message and it is therefore eagerly awaited by an expectant world! Is it asking too much that you lay aside preconceived ideas, opinions, or prejudices and read the Ehret articles with an open mind, particularly his article "Tragedy of Nutrition." Hopefully the truth will eventually dawn upon you, possibly months after reading--for some portion may have indelibly stamped an imprint on your mind--and intuitively proven its correctness!" -Excerpt from the book's Forward by Fred S. Hirsch (Long-time Student of Arnold Ehret and former owner of Ehret Publishing)

“ Lash is capable of explaining the mind-bending concepts of Gnosticism and pagan mystery cults with bracing clarity and startling insight. . . . [His] arguments are often lively and entertaining. ” —Los Angeles Times Fully revised and with a new preface by the author, this timely update is perfect for readers of *The Immortality Key*. Since its initial release to wide acclaim in 2006, *Not in His Image* has transformed the lives of readers around the world by presenting the living presence of the Wisdom Goddess as never before revealed, illustrating that the truth of an impactful Gnostic message cannot be hidden or destroyed. With clarity, author John Lamb Lash explains how a little-known messianic sect propelled itself into a dominant world power, systematically wiping out the great Gnostic spiritual teachers, the Druid priests, and the shamanistic healers of Europe and North Africa. Early Christians burned libraries and destroyed temples in an attempt to silence the ancient truth-tellers and keep their own secrets. *Not in His Image* delves deeply into ancient Gnostic writings to reconstruct the story early Christians tried to scrub from the pages of history, exploring the richness of the ancient European Pagan spirituality—the Pagan Mysteries, the Great Goddess, Gnosis, the myths of Sophia and Gaia. In the 15th Anniversary Edition, Lash doubles down on his original argument against redemptive ideology and authoritarian deceit. He shows how the Gnostics clearly foresaw the current program of salvation by syringe, and places the Sophianic vision of life centrally in the battle to expose and oppose the evil agenda of transhumanism, making this well-timed update more relevant than ever. “ Sometimes a book changes the world. *Not in His Image* is such a book. It is clear, stimulating, well-researched, and sure to outrage the experts. . . . Get it. Improve not just your own life, but civilization ’ s chances for survival. ” —Roger Payne, author of *Among Whales*

Called "my menopause bible" by half a million women, the best book on menopause is now better. Originally published in 1992 and still a top best-seller. Completely revised with 100 new pages. Susan S. Weed (author of the best-sellers *Breast Cancer. Breast Health! the Wise Woman Way*, *Wise Woman Herbal for the childbearing Year*, and *Healing Wise*) has completely rewritten this classic after listening to over 20,000 women talk about menopause and what works for them. All the remedies women know and trust plus hundreds of new ones. New Sections on thyroid health fibromyalgia, hairy problems, male menopause, and herbs for women taking hormones. Recommended by Susan Love MD and Christiane Northrup MD. Introduction by Juliette de Bairacli Levy. Beautifully illustrated, superbly indexed, wrapped in the healing cloak of the *Ancient Ones*, this is a book for owen of all ages who want strong bones, healthy hearts, and a

This study is the first to assemble the evidence for the existence of sorcerers in the ancient world; it also addresses the question of their identity and social origins. The resulting investigation takes us to the underside of Greek and Roman society, into a world of wandering holy men and women, conjurors and wonder-workers, and into the lives of prostitutes, procuresses, charioteers and theatrical performers. This fascinating reconstruction of the careers of witches and sorcerers allows us to see into previously inaccessible areas of Greco-Roman life. Compelling for both its detail and clarity, and with an extraordinarily revealing breadth of evidence employed, it will be an essential resource for anyone studying ancient magic.

THE HERBAL MEDICINE-MAKER'S HANDBOOK is an entertaining compilation of natural home remedies written by one of the great herbalists, James Green, author of the best-selling THE MALE HERBAL. Writing in a delightfully personal and down-home style, Green emphasizes the point that herbal medicine-making is fundamental to every culture on the planet and is accessible to everyone. So, first head into the garden and learn to harvest your own herbs, and then head into your kitchen and whip up a batch of raspberry cough syrup, or perhaps a soothing elixir to erase the daily stresses of modern life.
